

IN THE UNITED STATES DISTRICT COURT
FOR THE WESTERN DISTRICT OF PENNSYLVANIA

ACCU-SPEC ELETRONIC
SERVICES, INC.,
Plaintiff

v. CIVIL ACTION NO. 03-394 ERIE

CENTRAL TRANSPORT
INTERNATIONAL, INC. and
LOGISTICS PLUS, INC.,
Defendants

JURY TRIAL - DAY NO. 3

Proceedings held before the HONORABLE

SEAN J. McLAUGHLIN, U.S. District Judge,

in Judge's Chambers & Courtroom C,

U.S. Courthouse, Erie, Pennsylvania,

on Wednesday, October 19, 2005.

APPEARANCES:

W. PATRICK DELANEY, Esquire, appearing on behalf
of the Plaintiff.

JEFFREY D. COHEN, Esquire, appearing on behalf

W. JOHN KNOX, Esquire, appearing on behalf of
Defendant Logistics Plus, Inc.

Ronald J. Bench, RMR - Official Court Reporter

3 (Whereupon, the proceedings began at 9:00 a.m., on

4 Wednesday, October 19, 2005, in Courtroom C.)

5

6 THE COURT: Good morning, members of the jury. All

7 right, are we ready to continue?

8 MR. COHEN: Yes, your Honor.

9 THE COURT: Where were we witness wise, by way of
10 refreshing my recollection?

11 MR. COHEN: I believe Central Transport had called
12 its second witness, Mr. Cackowski, and cross-examination was
13 completed. And Central Transport was about to call its third
14 and final witness.

15 THE COURT: You can certainly do that.

16 MR. COHEN: Central Transport calls Dale Meabon.

17 DALE MEABON, CENTRAL TRANSPORT WITNESS, SWORN

18 DIRECT EXAMINATION

19 BY MR. COHEN:

20 Q. Good morning, Mr. Meabon.

21 A. Good morning.

22 Q. If you could please state your full name for the jury?

23 A. Dale Meabon.

24 Q. And which company do you work for, Mr. Meabon?

25 A. Central Transport.

1 Q. And what is your job title there?

2 A. Driver.

3 Q. If you could explain to the jury basically what your job

4 history is, how long have you been working for the company and

5 what you've been doing?

6 A. I've been working for the company four and a half years,

7 I've been driving a truck 28 years.

8 Q. And with respect to your driving the truck for 28 years,

9 have you had a citation in 28 years of driving?

10 A. No, I haven't.

11 Q. With respect to this shipment, which is the subject of

12 this litigation, which is a crate that was moved that contained

13 an X-ray machine, are you familiar with this case?

14 A. Yes, I am.

15 Q. Were you the driver that was the delivery driver for this

16 particular shipment?

17 A. Yes, I was.

18 Q. What area do you work in?

19 A. Right in the Erie area.

20 Q. And which warehouse during the time of this

21 transportation did you operate out of?

22 A. West 17th Street, Erie facility.

23 Q. And on the day that you came to get the shipment to

24 deliver it, what did you do, what is the procedure when you
25 come to the warehouse?

5

1 A. I got to work, took a look in my trailer, the crate that
2 we're talking about was sitting on the tail of my trailer,
3 filling up the whole back of the trailer, all I could see is
4 the one side of it.

5 Q. What did you do then?

6 A. Well, I closed the door on the trailer, went in and
7 picked up my bills or delivery receipts. Talked to the
8 terminal manager for a minute, hooked up and left.

9 Q. And where did you -- well, I guess this thing was on the
10 end of the trailer, correct?

11 A. Right, on the very back of the trailer.

12 Q. Was there other freight behind it?

13 A. Yes, the trailer was full, it had other freight, too.

14 Q. Now, where were you taking it?

15 A. To Accu-Spec in McKean.

16 Q. How far is Accu-Spec from the Erie terminal?

17 A. Approximately, 10 miles.

18 Q. In those 10 miles, was there anything unusual that
19 happened?

20 A. No, nothing.

21 Q. Did you hit any big potholes?

22 A. No.

23 Q. Did you go around any corners, really sharp corners fast?

24 A. No, I did not.

25 Q. Anybody stop short in front of you where you had to jam

6

1 on your brakes?

2 A. No.

3 Q. So it was I guess an uneventful eight miles?

4 A. Right.

5 Q. When you got to the destination, Accu-Spec, what did you
6 do next?

7 A. A person came out, I told them I had a delivery, I

8 stopped in the middle of the parking lot. The crate was too

9 big to unload at their docks, so we had to do it in the parking

10 lot, opened the door of the trailer.

11 Q. How long were you there total?

12 A. Probably an hour, little over an hour.

13 Q. What were you doing most of the time?

14 A. Mostly sitting waiting for the moving and rigging company

15 to get there to take the crate off the trailer.

16 Q. Once the rigging company got there, what did the rigging

17 company do?

18 A. They unloaded their forklift, put on their fork

19 extensions, drove up behind the trailer, lifted the crate off

20 the trailer and set it down on the ground.

21 Q. Now, you mentioned a delivery receipt, I'm going to show

22 you an exhibit, it's found at Exhibit 2 in that little notebook

23 you have in front of you, Mr. Meabon, I'm also going to put it

24 up in front of the screen, that will be in front of the jury

25 and also yourself. Okay, is this what's known as a delivery

7

1 receipt?

2 A. Yes, it is.

3 Q. And who signed the delivery receipt -- over there where

4 the yellow arrow is?

5 A. J. Mullen.

6 Q. Was the person who signed that one of the guys who was at

7 Accu-Spec?

8 A. Yes, he was.

9 Q. And what is this signature over here on the right side

10 where the arrow is?

11 A. That's my signature.

12 Q. All right. When, if you remember, when did the signature

13 take place, was it after the freight was -- after the door was

14 opened?

15 A. Yes, the signature was signed after the door was opened,

16 I can't really remember if the crate was on or off the truck

17 yet.

18 Q. Now, after you had the delivery receipt signed and the

19 freight was off your trailer, what did you do next?

20 A. Well, I was closing up my trailer, they were removing the

21 side off the crate, I was just curious, so I was standing there

22 while they took the side off the crate.

23 Q. You stuck around to see when they took the door off?

24 A. Yes.

25 Q. What did you see when they took the door off?

1 A. You could see a machine in the crate, that it rolled to
2 one side of the crate.

3 Q. Okay. In your experience driving a truck for 28 years,
4 have you had an opportunity to see large pieces of freight
5 crated?

6 A. I've seen yes, large crates.

7 Q. And have you had occasion to see the packaging inside
8 those crates?

9 A. Yes, on a few occasions.

10 Q. Now, you testified this machine rolled. If you could
11 describe to the jury, based on the internal packaging of that
12 crate, what your opinion is as to whether or not or what caused
13 the damage, the packaging or handling or what is your opinion?

14 A. I would just say poor packaging.

15 Q. Was there bracing on the top or in the middle of this
16 machine?

17 A. No, there wasn't any that I could see.

18 Q. Do you still deliver freight to Accu-Spec?

19 A. Yes, I have.

20 Q. How recently?

21 A. Either last Friday or just this Monday, I delivered a

22 skid of like a brown wrapping paper to them.

23 Q. Did the same guy come to the dock or was it different

24 people?

25 A. Different people.

9

1 Q. Mr. Meabon, how long have you known George Horetsky?

2 A. Approximately, four years.

3 Q. Have you had substantial interaction with Mr. Horetsky on

4 a regular basis?

5 A. Occasionally, if he's at the terminal, I see him.

6 Q. Do you know people in the community that know Mr.

7 Horetsky?

8 A. Yes, I do.

9 Q. Does Mr. Horetsky have a reputation in the community for

10 being a truthful person?

11 A. Yes.

12 MR. DELANEY: Can we have a side bar, your Honor?

13 THE COURT: Yes.

14 (At side bar on the record.)

15 THE COURT: Go ahead.

16 MR. DELANEY: I presume from the questioning that's
17 been asked, it's bolstering the reputation and credibility of
18 one of the witnesses, George Horetsky. And my impression is
19 that the rules will not permit reputation evidence to come in.

20 THE COURT: Hold on a second. Go ahead.

21 MR. DELANEY: My impression is that reputation
22 evidence will be inadmissible in a civil case with regard to a
23 fact witness who is a corporate employee. I have to tell you I
24 can't cite to the rule, I've don't have it, this is rather a
25 surprise, but that's my impression. Reputation testimony or

10

1 evidence concerning reputation is inappropriate in an effort to
2 simply bolster his credibility.

3 THE COURT: What do you have to say about this?

4 MR. COHEN: Your Honor, I direct your attention to
5 608 of the Federal Rules of Evidence, evidence of character.

6 THE COURT: Hang on just one second.

7 MR. COHEN: I can read it.

8 THE COURT: I can read it. All right, Rule 608(a)

9 says "the credibility of a witness may be attacked or supported
10 by evidence in the form of opinion or reputation but subject to
11 these limitations. One. The evidence may refer only to
12 character, truthfulness or untruthfulness. And, two, evidence
13 of truthful character is admissible only after the character of
14 the witness or truthfulness has been attacked by opinion or
15 reputation evidence or otherwise. How is his opinion, how is
16 this witness, Horetsky, how was Horetsky's reputation attacked
17 originally so as to trigger the applicability of the rule?

18 MR. COHEN: Mr. Horetsky's character for
19 truthfulness has been attacked in the opening statement of
20 counsel for Logistics Plus, when he indicated that Mr. Fanzini
21 will testify in direct contradiction to Mr. Horetsky's
22 testimony. This is a case about the credibility determination
23 of these witnesses. Mr. Fanzini is going to say the direct
24 opposite of Mr. Horetsky. Mr. Fanzini is expected to testify
25 that Mr. Horetsky said move the freight down to Class 50.

1 Basically, calling him a liar. Mr. Horetsky effectively
2 testified no, I never said that. That is a question of

3 truthfulness which has been called into question by the very
4 nature of the dispute in the case. It's central to one of the
5 defenses in this case. That's why we'd like to have this
6 introduction.

7 MR. DELANEY: I would say that the issue on
8 credibility of the limiting factor in 608 is that there has to
9 be an attack on the witness's character for truthfulness
10 through opinion testimony. I don't see 608 applying here.

11 THE COURT: It isn't triggered in this case, as in
12 most cases witnesses have different recollections. It would
13 have been triggered if he put someone on the stand who
14 testified to his bad reputation for truthfulness. The
15 objection is sustained.

16 (End of discussion at side bar.)

17 THE COURT: Members of the jury, there was a
18 question and answer just before we went over there at side bar,
19 I think the answer was yes, if I remember, disregard the
20 answer. Go ahead.

21 BY MR. COHEN:

22 Q. Have you ever received any complaints about Mr. Horetsky
23 doing your work?

24 A. No, I have not.

25 MR. COHEN: Mr. Meabon, thank you very much for your

12

1 time, I have no further questions.

2 CROSS-EXAMINATION

3 BY MR. KNOX:

4 Q. Mr. Meabon, good morning.

5 A. Good morning.

6 Q. I'm going to be very brief. Was this freight coming from

7 California, Mr. Meabon?

8 A. Yes, it was.

9 Q. And when you had contact with this freight, this was more

10 or less at the end of the trip?

11 A. Yes.

12 Q. How many miles basically were you driving the freight?

13 A. Approximately, 10 miles.

14 Q. When you picked up the freight, where did you pick it up

15 from?

16 A. From our Erie terminal.

17 Q. Is that Central Transport's terminal?

18 A. Yes, it is.

19 Q. Mr. Meabon, does the class of the freight matter for you
20 in any way in terms of how you handle the freight?
21 A. No, it doesn't, I treat every one the same, carefully.
22 Q. And, lastly, if you see a description of the freight
23 listed on the delivery receipt or some other type of document
24 that you might deal with that's described as one crate or one
25 skid, is that a common description that you see?

13

1 A. Yeah, that can be part of the description. Some going
2 into more detail than others.

3 Q. If you see a description that says one crate, though,
4 does that prevent you from picking it up?

5 A. No, it doesn't.

6 MR. KNOX: Thank you.

7 CROSS-EXAMINATION

8 BY MR. DELANEY:

9 Q. Mr. Meabon, my name is Patrick Delaney, I'm here for
10 Accu-Spec. What kind of a trailer were you driving or what
11 kind of a truck and trailer were you driving on January 14,
12 2003, when this delivery was being made to Accu-Spec?

13 A. The truck was a Ford L-9000, the trailer was a 48-foot
14 box trailer.

15 Q. Does that mean it's an enclosed trailer?

16 A. Yes.

17 Q. Not a flatbed?

18 A. Correct.

19 Q. As I understand it, when you come to work in the morning,
20 you come to the Central Transport warehouse and the truck's
21 already loaded for you?

22 A. Yes, it is.

23 Q. So you don't participate in the loading of the truck at
24 all?

25 A. No, I don't.

14

1 Q. Is that done during the night or the previous business
2 day, how does that work?

3 A. At that facility at the time it was done in the early
4 morning.

5 Q. And you don't, I presume from the fact that this 48-foot
6 trailer is full, you don't really have an opportunity to go in

7 and look at the cargo at all?

8 A. No, I don't.

9 Q. So you then leave the Central Transport depot and you

10 drive right to Accu-Spec, is that right?

11 A. That's correct.

12 Q. Because that's the first piece of cargo to come off?

13 A. Yes.

14 Q. Now, when you leave that day, do the people at the depot

15 give you a list of your cargo and the locations to be

16 delivered?

17 A. The only thing I have is a stack of delivery receipts,

18 that is the list, they're all in order.

19 Q. Do you receive any sort of history with regard to the

20 cargo; for example, this particular crate, where it has been

21 between California and Erie County, Pennsylvania?

22 A. No, I don't.

23 Q. That's not really important to you, I presume?

24 A. No, it's not.

25 Q. What is the height of that box trailer, what I call a box

1 trailer, from the bed to the ground?

2 A. I'd say approximately three-and-a-half to four feet.

3 Q. All right.

4 A. Probably four feet.

5 Q. In the process of unloading this crate at the Accu-Spec

6 facility, did you see anything happen that would have caused

7 damage in that unloading process?

8 A. No, I did not.

9 Q. I saw that Mr. Cohen put on the screen that receipt that

10 was signed by you and signed by someone from Accu-Spec, do you

11 remember that document?

12 A. Yes, I do.

13 Q. Now, that's not a bill of lading, though, is it?

14 A. No, that would be called a delivery receipt.

15 Q. Okay. Do you know where the bill of lading would be for

16 this piece of cargo?

17 A. No, I don't.

18 Q. So when you're given cargo to deliver locally, they don't

19 hand you the bill of lading to turn over to the recipient of

20 the cargo?

21 A. No.

22 Q. You say that you were on the Accu-Spec property long

23 enough to see the people at Accu-Spec open the crate?

24 A. Yes.

25 Q. You could see the damage to the crate, could you not?

16

1 A. Yes, I could once it was pointed out to me, yes.

2 Q. That was after it was off the trailer?

3 A. Yes.

4 Q. Is it correct that when it was on the trailer, you really

5 couldn't see any damage to either the crate or the equipment?

6 A. That's correct.

7 Q. How close did you get to this crate once it was opened

8 and how close did you get to this piece of equipment inside?

9 A. Probably within three to four feet.

10 Q. Did you see damage to the equipment?

11 A. That I'm not qualified to say, I mean, I could see the

12 machine had rolled to one side of the crate. I don't know

13 about the damage itself.

14 Q. Let me show you a picture, see if the picture -- this is

15 Plaintiff's Exhibit 15 -- does Plaintiff's Exhibit 15 depict

16 anything you saw that morning when you delivered the equipment

17 to Accu-Spec?

18 A. I don't really remember seeing that. I just remember

19 seeing the machine up against the side of the crate.

20 Q. Did you touch the machine, the outside of the machine?

21 A. No, I did not.

22 Q. Could you tell from your observation what it was made of?

23 A. Metal. I've been round long enough, I know it's made of

24 steel.

25 Q. Could you see the disassociation that is depicted in the

17

1 steel on this Exhibit 15?

2 A. Yes, I do.

3 Q. But you don't recall seeing that type of damage in the

4 limited view you had of the machine?

5 A. No, I don't.

6 Q. Now, once you get a signed receipt, you've got a trailer

7 full of cargo, I presume you have to get out of there to

8 deliver the rest of your freight?

9 A. Yes, I do.

10 Q. After these events, did Mr. Cackowski from Central

11 Transport contact you to find out what you knew about this

12 incident?

13 A. No, he did not.

14 Q. Did you ever work on a dock at any of Central Transport

15 depots?

16 A. No, I haven't.

17 Q. Did you ever watch the cargo being loaded on to any of

18 the trucks?

19 A. On occasion if, you know, a trailer is late or something,

20 I might see forklift operators loading.

21 Q. Do you know what the capacity of the forklifts are on the

22 Central Transport docks?

23 A. No, I do not.

24 Q. Do you know if they're greater than a 7,500 pound

25 capacity?

18

1 A. No, I don't.

2 MR. DELANEY: Thank you very much.

3 THE WITNESS: You're welcome.

4 THE COURT: Anything further?

5 MR. COHEN: Nothing further, your Honor.

6 THE COURT: Thank you very much, sir, you're free to

7 go. Does that wrap up your case, Mr. Cohen?

8 MR. COHEN: Yes, your Honor, Central Transport has

9 no further witnesses.

10 THE COURT: Are you all moved in by way of exhibits?

11 MR. COHEN: I believe so.

12 THE COURT: All right. Mr. Knox.

13 MR. KNOX: Thank you, your Honor. Your Honor, I'd

14 like to call Chris Fanzini to the stand, please.

15 THE COURT: All right. Mr. Fanzini, come on up

16 here, first spell your name for my court reporter before you're

17 sworn in.

18 THE WITNESS: Chris Fanzini, F-a-n-z-i-n-i.

19 CHRIS FANZINI, LOGISTICS PLUS WITNESS, SWORN

20 DIRECT EXAMINATION

21 BY MR. KNOX:

22 Q. Good morning, Mr. Fanzini.

23 A. Good morning.

24 Q. Sir, could you please state your full name?

25 A. Donald Christopher Fanzini, Jr., I go by Chris.

1 Q. Are you currently employed?

2 A. Yes.

3 Q. Where are you employed?

4 A. The UPS store.

5 Q. What is the UPS store?

6 A. It's a franchise out of UPS, shipping and packing

7 company, lots of walk-in counter people.

8 Q. Is anybody from Logistics Plus affiliated with you at the

9 UPS store?

10 A. Yes.

11 Q. Who is that?

12 A. That's Jim Berlin.

13 Q. Who's Jim Berlin?

14 A. He would be one of my partners.

15 Q. Did you have any previous employment prior to the UPS

16 store?

17 A. Yes.

18 Q. And where was that?

19 A. I worked at Logistics Plus.

20 Q. When were you there?

21 A. 2003, basically, for about a year, the year 2003.

22 Q. Were you there at the beginning of 2003?

23 A. Yes.

24 Q. Mr. Fanzini, what is Logistics Plus?

25 A. Logistics Plus is a worldwide logistics company, move

20

1 freight all around the world, big, small. Just a logistics

2 company.

3 Q. Do you have occasion when you were working at Logistics

4 Plus to negotiate freight for the shipments?

5 A. Yes.

6 Q. Do you have any other experience in the shipping

7 industry, the freight industry?

8 A. Yes, I do.

9 Q. What is that experience?

10 A. I got about 17, 18 years involved with transportation. I

11 was a truck driver for five to six years, I worked on a dock

12 for three to four years. I was the terminal manager. I packed

13 freight, towed motor freight, tarped freight. Used rail,

14 planes, boats, internationally. Basically, I did everything

15 when it comes to freight.

16 Q. Have you ever operated a forklift?

17 A. A thousand times.

18 Q. Mr. Fanzini, when working at Logistics Plus, what were

19 your responsibilities?

20 A. I was somewhat basically moving freight for people,

21 calling new contacts, trying to grow the local companies,

22 trying to get them into Logistics Plus, help move freight and

23 grow our business.

24 Q. When you say contacting people, what type of people or

25 companies are you talking about?

21

1 A. The traffic managers, owners, people that are in contact

2 with moving freight for companies they work for.

3 Q. Where is Logistics Plus located, incidentally?

4 A. They are right down in Union Station, right down here.

5 Q. That's in Erie?

6 A. Yes.

7 Q. How many employees did they have around that time in

8 2003?

9 A. Probably in the seventies, I'm not positive on that.

10 Q. Mr. Fanzini, during your time at Logistics Plus, as part

11 of your responsibilities, were you in contact with various

12 trucking companies, carriers, throughout the country?

13 A. Yes, I was.

14 Q. What was the nature of your contact with these carriers?

15 A. Basically, negotiating prices for people. Picking

16 companies, basically, I'm taking a map, I'm picking a company

17 that's good in this part of the country, picking a company

18 that's good in this part of the country, negotiating rates and

19 finding out what's the best carrier to move freight for

20 everybody. Everybody I've contacted to move freight from the

21 east coast to the west coast, lot of international, I have to

22 pick and choose the best situation and the best freight

23 companies to move this freight.

24 Q. In carrying out your responsibilities, did you become

25 familiar with various trucking company rates?

1 A. Absolutely.

2 Q. Were you familiar with Central Transport?

3 A. Yes, I was.

4 Q. Were you familiar with their rates?

5 A. Yes, I was.

6 Q. Compared to some of the other trucking companies you

7 dealt with, how did their rates compare?

8 A. Their rates were lower. Sometimes a lot lower.

9 Q. Are there any pricing schedules at Logistics Plus in

10 terms of how you charge a customer?

11 A. Repeat that one more time.

12 Q. Are there any pricing guidelines at Logistics Plus that

13 help you determine --

14 A. Yes, there's tariffs, there's contracts, there's

15 discounts of our contracts.

16 Q. Did Central transport, to your knowledge, when you were

17 working at Logistics Plus, have a discount?

18 A. They did have a discount, yes.

19 Q. What was that discount?

20 A. It was 40 percent off of our rates.

21 Q. How did that compare to other carrier discount rates?

22 A. The closest discount was 30 percent, everybody basically

23 ran about 22 to 25 percent off of our rates.

24 Q. So Central Transport was one of the cheapest carriers

25 that you dealt with?

23

1 A. Absolutely.

2 Q. Mr. Fanzini, does part of what Logistics do, does price

3 enter into how they carry out their services?

4 A. As to their price?

5 Q. Yes.

6 A. Yes, absolutely.

7 Q. How so?

8 A. Well, we try to work the best price, we're growing our

9 business, we're trying to get the best price for all different

10 customers, yes.

11 Q. Let's say I want to ship a piece of freight, why would I

12 go to Logistics Plus, how would you help a customer?

13 A. Because we know the proper way to ship your freight.

14 Q. Could I get a better price by going through Logistics

15 Plus or could I get a better price if I just call up the truck

16 company myself?

17 A. You'll get a better price going through Logistics Plus.

18 Q. Why is that?

19 A. Because Logistics Plus, just like a lot of big companies
20 in this world, General Electric, they have good discounts with
21 these trucking companies, trucking companies want to haul
22 freight. What happens is we have salesman come in, we
23 negotiate prices. Hey, listen, if you want what we ship,
24 you've got to help us out with the prices. Basically, our
25 prices are the best price to negotiate.

24

1 Q. Lastly, just to fill out the background picture here a
2 little bit, does Logistics Plus operate any trucks?

3 A. No, not one.

4 Q. Are you in the business of packing or handling freight?

5 A. No.

6 Q. Mr. Fanzini, do you remember a transaction involving
7 Accu-Spec back in January of 2003, which is the subject of this
8 case?

9 A. Yes.

10 Q. And were you involved in that transaction?

11 A. From minute one.

12 Q. How were you involved first?

13 A. I basically set up the shipment.

14 Q. And how was the shipment set up?

15 A. I get a phone call --

16 Q. Who called?

17 A. Jim Mullen from Accu-Spec. He gives me a call, he says I

18 have a crate to pick up out in California. I get the size, I

19 get the weight, find out where it's going. I go right on my

20 computer and give him a price right there.

21 Q. So if I understand your testimony correctly, Mr. Mullen

22 contacts you by phone?

23 A. Yes.

24 Q. Is that the first event in this transaction?

25 A. Yes.

25

1 Q. Did you call him first?

2 A. No, he called me.

3 Q. Incidentally, who is Mr. Mullen?

4 A. It's my father-in-law.

5 Q. And he works at Accu-Spec?

6 A. Yes -- no, well, he used to.

7 Q. So he calls you up, what specifically did Mr. Mullen say

8 to you?

9 A. He says, Chris, I need to get a good price on a crate

10 that needed to be picked up. I asked him the size of it, where

11 it's at. Basically, I just gave him a rate.

12 Q. Generally is that the kind of information that you

13 request when making a quote?

14 A. Yes.

15 Q. And when he gave you that information, what did you do

16 with that?

17 A. I just got right on Logistics Plus database. We have all

18 the discounts and everything set up, we give rates right away

19 to customers, that is one of the better things that Logistics

20 Plus has. I punched in the numbers, gave him a rate.

21 Basically, that's it.

22 Q. Are you doing this right at your desk, at your computer?

23 A. Yeah, just kind of like this, punching in the numbers,

24 the rates, the discounts. I see, what we do, I punch in my

25 rate, then I add on what I want to make. Basically, this is

1 what I have to pay, how much do I want to make off of this.

2 What do I think it's worth, do it like that. That's how we

3 make our money.

4 Q. Mr. Fanzini, in making a quote such as the one in this

5 case, do you have to class the item that is going to be

6 shipped?

7 A. Yes.

8 Q. And did you in fact initially class this item after

9 speaking with Mr. Mullen?

10 A. Yes.

11 Q. What did you class it at?

12 A. I classed it at 100.

13 Q. Why did you do that?

14 A. The size, the density, just from being in trucking all my

15 life, you go off of how much room the trailer takes, what the

16 weight is of the crate, and I basically figure out class like

17 that.

18 Q. After you classed it and punched in all the other

19 information, the weight and the size, in other words, the

20 crate, did you generate a quote in fact?

- 21 A. I gave him a verbal quote.
- 22 Q. And what was that verbal quote?
- 23 A. Right around \$900, in the \$900 area.
- 24 Q. Did Mr. Mullen like that price?
- 25 A. Well, what he said is, Chris, can you do any better.

27

- 1 Q. How did you respond to that?
- 2 A. I said I can try, I can't promise you anything, I can
- 3 try.
- 4 Q. When he said to you, Chris, can you do any better, did
- 5 you have the capability at that point to re-class that item
- 6 right there at your computer and give him another quote?
- 7 A. Sure.
- 8 Q. Did you do that?
- 9 A. No.
- 10 Q. Why didn't you do that?
- 11 A. Because -- if you get caught doing something like that,
- 12 we're going to end up paying. You don't do that. You just
- 13 don't do that, that's not the way it happens.
- 14 Q. You could have re-classed it but you didn't?

15 A. Right there I could have did it.

16 Q. When Mr. Mullen tells you to see if you can get a better

17 deal here, what did you do next?

18 A. I called my Central Transport salesperson, which I like

19 to do chain of command. Basically, you can go basically to the

20 big pricing departments. So I called Central, which is George.

21 I just said --

22 THE COURT: Last name?

23 THE WITNESS: Horetsky. Basically, I just said hey,

24 I got this skid out in California, can we do any better on our

25 price. It's called like a spot quote.

28

1 THE COURT: Could you repeat that again, I'm having

2 trouble hearing you, start that all over again?

3 THE WITNESS: When I called George Horetsky, I asked

4 him if we can do any better on the price off of our rates.

5 It's called a spot quote. All trucking companies have them,

6 you can call them, this is a one time deal. It's taking up 10

7 foot of trailer, it's 5,000 pounds, this is the rate I'm

8 getting, can we do anything different about it. Basically, the

9 conversation we had was two to three minutes, it wasn't long at
10 all. He basically said just drop it down to 50 on the bill.
11 When you drop down a class, that just helps the price right
12 there. He did what he was -- I don't know if you're supposed
13 to do, that basically how the business works. You get the
14 freight picked up, you get it moved, it happens, everybody is
15 usually happy about it.

16 BY MR. KNOX:

17 Q. Are you saying that Mr. Horetsky changed the class on the
18 freight in your conversation?

19 A. Yes.

20 Q. Is that commonly done?

21 A. Once in a while, yes.

22 Q. When you first had your conversation with Mr. Horetsky,
23 did you tell him what your initial thought was about the class?

24 A. Repeat.

25 Q. When you first talked to Mr. Horetsky about getting a

1 better quote, did you tell him what you thought the class was?

2 A. Yes.

3 Q. And what did you tell him about that?

4 A. I just told him, actually, I think he even asked me what

5 was the class, it's a Class 100, that's what I have it rated

6 at. This is the weight, this is the size. He says just drop

7 it down to 50.

8 Q. Did you at any time suggest to Mr. Horetsky that he

9 should change the class?

10 A. No.

11 Q. Why would somebody change the class on an item?

12 A. Just for price, just to help out, doing a favor, get the

13 job done.

14 Q. Mr. Fanzini, had you dealt with Mr. Horetsky before on

15 other shipments?

16 A. Yes, I did.

17 Q. Did you have a good relationship with him?

18 A. Very good.

19 Q. Did you have an understanding he understood you during

20 your transactions?

21 A. Sure.

22 Q. At any point during your conversation with Mr. Horetsky,

23 did he say that I don't have enough information to give you a

24 quote?

25 A. No.

30

1 Q. And, again, what information did you give him?

2 THE COURT: This is the last time through this,
3 we're repeating ourselves.

4 MR. KNOX: I'll withdraw that.

5 BY MR. KNOX:

6 Q. Mr. Fanzini, what was the quote eventually given by
7 Central Transport for Accu-Spec?

8 A. It was -- say that again.

9 Q. What was the quote eventually given to you by Mr.
10 Horetsky following the phone call?

11 A. It was \$590.

12 Q. Did you communicate that quote to Mr. Mullen at
13 Accu-Spec?

14 A. I called him right away.

15 Q. Did Mr. Mullen express that he liked that quote?

16 A. Yes, he did. He said that's a good price, we'll take
17 care of it.

18 Q. Ultimately, did Accu-Spec agree to have it shipped at

19 that rate?

20 A. Yes.

21 Q. What did you do next at that point?

22 A. Basically, I just got the information on where it was to

23 be picked up, where it's delivering to, the contact name of the

24 shipper, which would be Dage out in California. I need to

25 contact them to make sure the skid's right and ready to go.

31

1 And then I will contact the trucking company to send the truck

2 out for pick up.

3 Q. Do you use any of the information that you had from Mr.

4 Mullen to generate the bill of lading?

5 A. Yes, I did.

6 Q. Did you in fact generate the bill of lading?

7 A. Yes, I did.

8 Q. Mr. Fanzini, I want to put up on the screen here a

9 document that's been offered into evidence as Plaintiff's No.

10 25, have you seen that document, sir?

11 A. Yes, I have.

12 Q. What is that document?

13 A. This is the Logistics Plus bill of lading that we send to
14 the shipper.

15 Q. And the quantity and the description and the weight and
16 the class listed there, who put that information on there?

17 A. I did.

18 Q. What was the source of that information?

19 A. What I was told from Accu-Spec.

20 Q. And, Mr. Fanzini, let's backtrack a little bit. Were
21 there two quotes here, basically?

22 A. Yes.

23 Q. A quote you gave and a quote that Central Transport gave?

24 A. Yes.

25 Q. Yesterday Mr. Mullen -- I'm sorry, Mr. Carlson testified

32

1 that, if I'm characterizing his testimony correctly, that price
2 didn't matter with regard to this shipment. Did you get that
3 sense in your conversations with Mr. Mullen?

4 A. He asked me to get a better price or see if I could get a
5 better price.

6 Q. Do you know if Mr. Mullen knew that Logistics Plus had

7 the wherewithal to negotiate better prices?

8 A. I think he does.

9 Q. Mr. Fanzini, yesterday Mr. Mullen testified and admitted

10 that he never told you that what was being shipped was an X-ray

11 machine, do you agree with that?

12 A. Yes.

13 Q. Did Mr. Mullen at any time tell you or write to you

14 saying that this X-ray machine was worth \$120,000?

15 A. No, he didn't.

16 Q. Did he talk to you about any other characteristics, it's

17 fragile or anything like that?

18 A. No.

19 Q. Mr. Fanzini, I want to put up on the screen another

20 document that's been marked CT-6, do you see that document,

21 sir?

22 A. Yes, I do.

23 Q. What is that document?

24 A. That is a written quote.

25 Q. And who generated that quote?

1 A. Logistics Plus.

2 Q. Did you play any role in generating this quote?

3 A. Well, not typing it out or anything, I'm the one that

4 gave the quote.

5 Q. Is this a document that is routinely used by Logistics

6 Plus in making quotes?

7 A. Yes.

8 Q. I want to show you some information right here. Do you

9 see where I marked that?

10 A. Yes.

11 Q. What does that say?

12 A. It says "quotes are based on information given at time of

13 quote. If variables such as dimensions, class and/or weight

14 change, this quote will no longer be valid."

15 Q. Generally speaking, what does that mean from your

16 perspective?

17 A. Well, basically, if somebody ships a crate and I don't

18 want to use the word bong, but if there's some drugs or

19 something in it, this is telling you that everything is nul and

20 void here, off the information that you gave us. Plus a lot of

21 people when they ship things, they will maybe not put the right

22 weight down, and a lot of things go off the weight, so there's
23 a lot of things being re-weighed on the systems, all trucking
24 companies. Basically, this holds if you lied to us, this quote
25 is not valid anymore.

34

1 MR. KNOX: Thank you. Judge, I'd like to move that
2 document into evidence.

3 THE COURT: It's admitted. I'm sorry, could you
4 identify it?

5 MR. KNOX: It's identified as CT-6.

6 THE COURT: All right.

7 BY MR. KNOX:

8 Q. Mr. Fanzini, I'd like to you show you the bill of lading
9 very quickly again here?

10 A. Okay.

11 Q. The description of the item here, it's listed basically
12 one crate on the bill of lading, do you see that?

13 A. Yes.

14 Q. Is that a common generic description of freight that you
15 use in carrying out your responsibilities?

16 A. Yes.

17 Q. Do truck drivers, to your knowledge, based on your
18 experience, have any problem in transporting or picking up
19 freight based on that type of description?

20 THE COURT: Could you repeat that.

21 BY MR. KNOX:

22 Q. Do truck drivers or anybody handling the freight, have a
23 problem handling or picking up freight based on a description
24 like that?

25 A. No.

35

1 Q. After the bill of lading is generated by the information
2 given to you about Mr. Mullen, what happens next, what did you
3 do next?

4 A. After the bill of lading?

5 Q. After the bill of lading, what do you do next?

6 A. First I find out when the freight is to be ready to be
7 picked up. I get ahold, I always get in contact, I don't want
8 to send drivers in waiting for freight that isn't ready. I
9 contact the people out there, find out if it's ready, get ahold

10 of the trucking company and set up a pick up.

11 Q. Did you in fact do that?

12 A. Yes, I did.

13 Q. Did you have any contact with Central Transport during
14 this time?

15 A. Yes, I did.

16 Q. Who did you speak with?

17 A. I don't really have a name, I contacted the California
18 terminal themselves to set up a pick up.

19 Q. To your satisfaction was the shipment essentially set up?

20 A. Yes, it was.

21 Q. What happened next?

22 A. It got picked up, got moved across the country. Banged
23 up a little bit I presume in delivery hands. I don't know,

24 once the freight is picked up, we call the next day and get the

25 tracking number. And then we relay the trucking number to the

36

1 customer. And from there it's in the trucking company's hands.

2 Q. Did you have any contact with Dage or Central Transport

3 during the time it's coming across the country?

4 A. No.

5 Q. After the freight was dropped off at Accu-Spec's

6 facility, were you informed about anything?

7 A. Yes, I was informed that there was some damage to the

8 crate.

9 Q. And who informed you?

10 A. Jim Mullen.

11 Q. Do you know how he informed you?

12 A. He called me up from his cell phone, he was out in the

13 parking lot. He said we have -- the crate is banged up a

14 little bit. And we were going to open the crate.

15 Q. Do you remember when approximately, in relation to when

16 the freight was dropped off at Accu-Spec, that Mr. Mullen

17 contacted you about this?

18 A. He told me that it was -- basically, what was said

19 earlier today, I don't know, I'm not positive, but he said he

20 could still see the Central Transport truck before it would get

21 on I-79, so it was on that main road out there. So it had to

22 be two minutes, three minutes, I would imagine, right after the

23 off loading. I wasn't there, so I'm not positive on that one.

24 Q. After you were contacted, did you then do anything at

25 that point?

37

1 A. Actually, I called George right away, George Horetsky.

2 Q. That's the gentleman from Central Transport?

3 A. Yes.

4 Q. What did you tell him?

5 A. I said this crate was damaged, is there a way you can get

6 out there and take a look at this thing.

7 Q. What did he say?

8 A. He said yes.

9 Q. Did he come up?

10 A. Yes.

11 Q. When did he come up?

12 A. I'm not positive on time, he was up there that day.

13 Q. Did you go and inspect the freight at some point?

14 A. No, I didn't.

15 Q. Did you view the crate at any point in time after it was

16 delivered?

17 A. Yes, I did. Not that day, but yes, I did.

18 Q. When did you view it?

19 A. Actually, the day after I had it picked up and brought to
20 our warehouse so we can get an inspector to come and inspect
21 this. Right away that's what you have to do for claims. The
22 inspection, I had it set up, he came and inspected it.

23 Q. Mr. Fanzini, when you first started talking here today,
24 you talked a little bit about your background in the shipping
25 and trucking industry.

38

1 A. Sure.

2 Q. As a truck driver or a forklift driver, had you ever had
3 an occasion, separate from this, in dealing with damaged
4 freight?

5 A. Yes.

6 Q. Had you ever inspected damaged freight prior to this
7 transaction?

8 A. I've seen it, inspected it, looked at it. I'm not an
9 inspector, I've looked at it, yes.

10 Q. Have you as a truck driver or a forklift driver, ever
11 damaged freight yourself?

12 A. Absolutely.

13 Q. After you came to view this crate and the damage to its

14 contents, what did you notice?

15 A. I just noticed that the crate was handled, I don't know

16 where or how, but it was handled pretty rough.

17 Q. Why do you say that?

18 A. This machine had a movement inside, inside the crate and

19 it shouldn't. It should be setting right in there, it should

20 not move, should get somewhere safe, not get banged around.

21 Q. Do you have any experience in packing freight?

22 A. No, not really.

23 Q. Did you notice anything about the packing on this crate?

24 A. Well, it looked kind of chintzy to me.

25 MR. DELANEY: Your Honor, I would object, I don't

39

1 think there is a foundation.

2 THE COURT: Sustained, there is no foundation.

3 Disregard that comment.

4 BY MR. KNOX:

5 Q. You don't need to talk about packing, Mr. Fanzini.

6 A. Okay.

7 Q. After you viewed the freight, did you have a conversation
8 with Mr. Horetsky about what was going to be done here about
9 this situation?

10 A. Yes, I did.

11 Q. What was that conversation?

12 A. I just said, I asked George, I said how do you want to
13 handle this right now.

14 Q. What did he say?

15 A. We'll start a claim, start the paperwork.

16 Q. And what did he say?

17 A. He said you know, after looking at it, this will be
18 handled, okay. So I figured --

19 THE COURT: You're mumbling, I can't hear you.

20 THE WITNESS: I figured, he said it would be
21 handled, after looking at the freight itself.

22 BY MR. KNOX:

23 Q. When he said to you that it would be handled, how did you
24 interpret that?

25 A. That the claim through Central Transport and Accu-Spec

1 would be taken care of, the damage to the freight.

2 Q. Mr. Mullen testified yesterday that he sent out a letter

3 to pretty much everybody involved here, to Dage, to you, to

4 Central Transport, a few others, basically saying like all

5 these people are attempting to resolve this claim, did you ever

6 see that letter, sir, in February?

7 A. Yes.

8 Q. He also said something interesting yesterday that after

9 that letter went out, nobody responded to the letter; do you

10 agree with that?

11 A. No, I don't.

12 Q. Why don't you agree with that?

13 A. Because I responded to the letter.

14 Q. How did you respond?

15 A. It wasn't to the response that he wanted to hear.

16 Basically, I kept on trying to get Central -- this is now

17 between Accu-Spec and Central Transport. I can't respond to

18 what's going on with the claim, I just call the up aboves, like

19 I said, the chain of command, I go a step higher. We need to

20 get this claim taken care of, what do we have to do here. And

21 I let my father-in-law know what I was doing. I have contacts

22 with him about that. But probably not what he wanted to hear.

23 I just give him what I can.

24 Q. How many times would you estimate that you were in

25 communication with Mr. Mullen or anybody else at Accu-Spec

41

1 during this period of time?

2 A. Boy, a dozen times, I would think. There was a lot of

3 phone calls made. From the day on, for the first couple weeks,

4 we were on the phone trying to get this thing moving right

5 away.

6 Q. Eventually, were you made aware of the fact that

7 Accu-Spec made a formal claim against Central Transport?

8 A. I think so -- I can't remember, yes.

9 Q. Do you know in approximately April of 2003, whether

10 Accu-Spec made a formal claim against Logistics Plus?

11 A. Yes.

12 Q. How did they make a claim against either party -- how was

13 that done, how do you make a formal claim?

14 A. Well, through the trucking companies. There's proper

15 paperwork you have to fill out. I'm really not positive,

16 basically, just get a lawyer and you start a claim then.

17 Q. Lastly, Mr. Fanzini, knowing what you know now, this
18 obviously was an X-ray machine that was worth considerable
19 value, estimated at \$120,000. If Mr. Mullen had told you that
20 this was an X-ray machine, that it was worth \$120,000, would
21 you have done anything differently in setting this shipment up?

22 A. Absolutely.

23 Q. What would have you done differently?

24 A. I would have shipped it differently. I would have
25 negotiated different prices with different carriers. Like we

42

1 said before, Central, they get the job done but they are the --
2 the less expensive company in the trucking industry. So read
3 into that, but I would definitely move it a different way.

4 Q. How would you move it a different way?

5 A. I would have gave Accu-Spec different ideas. I would
6 have moved them on just one truck. You've got to pay the
7 price, it's a damageable thing, you don't want to put any other
8 freight on this trailer with this thing. You really would put
9 it --

10 Q. Why would you have done that?

11 A. With a \$150,000 X-ray machine, you want to get the thing
12 there, not just price, you want to get the thing there in good
13 shape.

14 MR. KNOX: Thank you, Mr. Fanzini, I have nothing
15 further.

16 CROSS-EXAMINATION

17 BY MR. DELANEY:

18 Q. Mr. Fanzini, I introduced myself out in the hallway, I'm
19 Pat Delaney, I'm here for Accu-Spec. Are you aware that your
20 testimony differs from that -- your recollection that you have
21 differs from that of your father-in-law with regard to how the
22 transaction came down?

23 A. If you say that, I wasn't here yesterday.

24 Q. You've indicated for us that when you first had this call
25 from Mr. Mullen, that you classed the equipment -- I'm sorry,

43

1 you classed the cargo as 100, Class 100?

2 A. Yes, I classed the freight at 100.

3 Q. And that produced a price of about \$900?

4 A. Yes.

5 Q. How was it that you chose Class 100?

6 A. Size and weight.

7 Q. Is Class 100 a dense freight or a less dense freight --

8 I'm sorry, is Class 100 a more dense freight or a less dense

9 freight than Class 50?

10 A. Less dense freight.

11 Q. This is two-and-a-half tons, why, again, did you pick

12 Class 100 for a crate that would contain something weighing

13 two-and-a-half tons?

14 A. That is the proper class actually.

15 Q. I see. So the Class 100 has that particular weight

16 parameter?

17 A. Yes.

18 Q. We saw an exhibit from Central Transport yesterday, I

19 think, and it's Exhibit CT-4. And this is a page from the

20 National Motor Freight Classification book, are you familiar

21 with that book?

22 A. Yes, I am.

23 Q. Is that how one person in your position goes about

24 classifying freight?

25 A. If you need to, yes.

1 Q. It's curious because it has a reference to X-ray

2 machines, do you see that?

3 A. Yes, I do.

4 Q. And X-ray machines not exceeding -- X-ray machines not

5 exceeding \$30 a pound. That would be this piece of machinery?

6 A. Yes, sir.

7 Q. Can you tell us what the classifications for X-ray

8 machines which have a value not exceeding \$30 a pound would be?

9 A. Class 100.

10 Q. So that's the class that you picked right off the bat?

11 A. Yes.

12 Q. Yesterday we had George Horetsky testify.

13 A. Okay.

14 Q. And he talked about your conversation with him -- about

15 rate, about price?

16 A. Okay.

17 Q. He said that -- first of all, you did not tell him

18 anything about the contents of this crate?

19 A. Correct.

20 Q. And he said you called and said can you get me a Class 50
21 rate. I asked him, did you understand that Chris was telling
22 you that this was a piece of freight that was not fragile, that
23 he was expressing to you the character of the freight and he
24 said no, he was asking me for a price. Do you agree that
25 that's what you were asking him for?

45

1 A. No, not the way you said it.
2 Q. What do you recall that conversation to be?
3 A. If I wanted to class it at 50, I could have done it
4 myself, I wouldn't have to call anybody. I could do it right
5 off the machines. I called him to get a spot quote. Like I
6 explained before a spot quote, is a one time deal where you
7 could ask the pricing department. Maybe somebody's got a
8 trailer, not everybody is coming out of California at the time,
9 you know, we'll put some freight on for this price. Maybe if
10 not, they have a chance of booking freight. I called him for a
11 spot quote.
12 Q. Is that the only transaction you had with him, just a
13 spot quote?

14 A. Until after.

15 Q. He gave you the spot quote and you took it back to Mr.

16 Mullen?

17 A. He basically said drop it to a Class 50. I got the price

18 right off the database then.

19 Q. All right. The point of my conversation or my questions

20 with Mr. Horetsky and what I think he acknowledged for me, was

21 that you had not misled him about the nature of this freight.

22 Would you agree that you didn't try to misrepresent the nature

23 of the freight to Mr. Horetsky?

24 A. No, I told him what I knew.

25 Q. You told him what you knew?

46

1 A. Yes.

2 Q. We've seen this quote that you prepared and sent on the

3 Logistics letterhead?

4 A. Okay.

5 Q. Do you recall an e-mail that was sent by Mr. Mullen to

6 you, I believe describing freight as equipment?

7 A. Actually, I've seen it recently. I don't remember, but

8 I've seen it, yes.

9 Q. Do you acknowledge that you would have received that?

10 A. Yes.

11 Q. And do you acknowledge that you were given information to

12 the effect that the freight was to be picked up at Dage

13 Precision Industries?

14 A. Yes.

15 Q. And you were given an accurate number for the weight of

16 the freight?

17 A. Yes.

18 Q. Were you given an accurate description of the dimensions

19 of the freight?

20 A. When you say accurate, yes, I got what they sent me.

21 Like I said, I never seen the freight. I'm going off of what

22 my customer tells me, yes.

23 Q. And, finally, did Mr. Cackowski, the claims person for

24 Central Transport, ever contact you as part of his

25 investigation into Accu-Spec's claim?

1 A. I don't think I ever talked to that man.

2 MR. DELANEY: Thank you, very much.

3 THE COURT: We're going to take a short recess.

4 (Recess from 10:04 a.m.; until 10:15 a.m.)

5 THE COURT: All right, Mr. Cohen.

6 MR. COHEN: Thank you, your Honor.

7 CROSS-EXAMINATION

8 BY MR. COHEN:

9 Q. Good morning, Mr. Fanzini, my name is Jeff Cohen, I'm an
10 attorney that represents Central Transport in this case.

11 A. Good morning.

12 Q. You've testified that Logistics Plus is a logistics
13 company, is that correct?

14 A. Yes.

15 Q. Is it fair to say that their job is to help shippers move
16 freight around not only the country but around the world?

17 A. Yes.

18 Q. Many times is it fair to say Logistics Plus sometimes has
19 employees actually in the facilities of shippers to help them
20 with their logistics needs?

21 A. Yes.

22 Q. You testified that you have a lot of experience and
23 sounds like you have a lot of experience with respect to

24 transportation issues, correct?

25 A. Yes.

48

1 Q. Sounds like you do everything from driving a truck to --

2 A. Yes.

3 Q. To writing the bill of lading. Would you consider

4 Logistics Plus a very sophisticated logistics company, as far

5 as sophisticated knowledge in the transportation industry?

6 A. Yes.

7 Q. Are you familiar -- well, I presume that you are familiar

8 with the paperwork which is necessary to move freight from

9 point A to point B?

10 A. Yes.

11 Q. And in fact you draft, you write some of this paperwork,

12 at least fill it out, correct?

13 A. Yes.

14 Q. In this case there is a document known as a bill of

15 lading, you've heard the term bill of lading before, right?

16 A. Yes.

17 Q. Bill of lading is pretty much the governing document

18 which controls the transportation of the freight, is that

19 right?

20 A. Yes.

21 Q. In this case Logistics Plus is sophisticated enough to

22 have its own bills of lading, correct?

23 A. Yes.

24 Q. Many shippers because they don't ship that often, don't

25 have their own bill of lading, is that correct?

49

1 A. I'm not sure about that.

2 Q. Like Accu-Spec, they didn't have their own bill of

3 lading, correct?

4 A. They could have one.

5 Q. Right, did they?

6 A. They didn't on this case.

7 Q. Have you read the Logistics Plus bill of lading?

8 A. Not really.

9 Q. It's small print in there?

10 A. Yes, some fine print.

11 Q. How many times have you used the Logistics Plus bill of

12 lading?

13 A. Few hundred.

14 Q. There's some things on there in the top which address the

15 terms under with freight moves, did you know that?

16 A. Do you have one I'll read it.

17 Q. I absolutely do.

18 MR. COHEN: Your Honor, I'd like to use the easel, I

19 have a couple blowups.

20 THE COURT: That's all right.

21 MR. COHEN: I'm going to provide him with a copy,

22 this is a copy of the existing exhibits.

23 BY MR. COHEN:

24 Q. For everyone's information, this is CT-1, just a blowup

25 of CT-1. I'll put it on the screen for the witness. All

50

1 right. You already testified that is the Logistics Plus bill

2 of lading that you filled out for transportation in this case,

3 correct?

4 A. Yes.

5 Q. Okay. The text on the top of this bill of lading, also,

6 Mr. Fanzini, it's Exhibit 1 in that notebook in front of you,
7 there's a couple different ways to evaluate this, it's the same
8 document. The text on the top of this copy of the bill of
9 lading is not clear, obviously, because it's been faxed around,
10 is that right?

11 A. Yes.

12 Q. The one that you prepared, the one that you filled out
13 that text would be legible, of course, correct?

14 A. Yes.

15 Q. There's another exhibit which I'll direct everyone's
16 attention to, it's Exhibit CT-13, and in your book, sir, it's
17 tab number 13?

18 A. Okay.

19 Q. Could you tell the jury what this document is?

20 A. This is a list of Logistics Plus bill of lading from --
21 what do you mean, it's a Logistics Plus bill of lading, what do
22 you want to know?

23 Q. I'll help you. Is this the Logistics Plus bill of lading
24 which governs the transportation of the X-ray machine in
25 question in the litigation from the Dodsworth warehouse in Erie

1 to 1345 West 11th in Erie?

2 A. Yes.

3 Q. Did you prepare this bill of lading?

4 A. Yes.

5 Q. Now, the text on the top of this bill of lading, well, is

6 the same form bill of lading, it's just for a different

7 movement?

8 A. Yes.

9 Q. The text on the top of the bill of lading is the same

10 text that what was on top of the original bill of lading used

11 for the shipment?

12 A. I don't know, I can't read it, it looks kind of big.

13 Q. Did you use the same form?

14 A. Yes.

15 Q. All right. Now, that language up there, that little text

16 up there where it says "received," did you ever read that

17 paragraph?

18 A. No.

19 Q. In the hundred times that you used the bill of lading?

20 A. No.

21 Q. Was it a hundred or a thousand?

22 A. Between 100 and a thousand.

23 Q. How many times have you used the bill of lading, if you

24 know?

25 A. I don't know.

52

1 Q. Was it 10,000?

2 A. No.

3 Q. This document says "received, subject to the

4 classifications and tariffs in effect on the date of the issue

5 of this bill of lading." Do you know what a tariff is?

6 A. Yes.

7 Q. What's a tariff?

8 A. It's a pricing agreement between trucking companies.

9 Q. Is there anything else a tariff could be?

10 A. Not that I know of.

11 Q. Do you know that trucking companies have tariffs which

12 basically rules circulars governing the transportation when

13 trucking companies are moving freight?

14 A. Repeat that, please.

15 Q. Absolutely. Do you know that trucking companies have

16 their own set of rules by which they move freight?

17 A. Yes.

18 Q. They sometimes are referred to as tariffs?

19 A. Yes.

20 Q. This sentence up there, "received, subject to the

21 classifications and tariffs in effect on the date of the issue

22 of this bill of lading," isn't it fair to say that is referring

23 to a trucking company tariff because you're preparing the bill

24 of lading at the moment of or by a particular trucking company,

25 isn't that correct?

53

1 A. Yes.

2 Q. Also, further down in that paragraph right about -- do

3 you see that circle on the screen?

4 A. Yes.

5 Q. Where it says number two -- the sentence is long, but

6 tell me if I summarize portion two correctly.

7 THE COURT: Do this, see the big board down there.

8 Go down and take a look at that. Keep your voice up, your back

9 is going to be to my court reporter, okay?

10 THE WITNESS: Yes, sir.

11 BY MR. COHEN:

12 Q. The one that is legible is CT-13, this text here. I'm

13 referring to where it says number two, okay. This is a long

14 sentence. But the reason I'm focusing on section two, it

15 addresses the motor carrier classification or tariff. The

16 other part of the sentence deals with if it's a rail or rail

17 water shipment, okay. Do you understand why -- let me ask you

18 this. Can your bill of lading be used for rail shipping?

19 A. Yes.

20 Q. Have you used this bill of lading for rail shipments?

21 A. I haven't.

22 Q. Okay. Can this bill of lading also be used -- obviously,

23 this bill of lading could also be used for trucking shipments,

24 correct?

25 A. Yes.

1 Q. And in this case it was?

2 A. Yes.

3 Q. In this section, number two of the sentence, it says

4 effectively, tell me if I'm wrong, in these movements by a

5 motor carrier like Central Transport, the motor carrier

6 classification for tariff applies, is that correct?

7 A. Yes.

8 Q. And when referring to the motor carrier classification,

9 in this case that's Central Transport, is that correct?

10 A. Yes.

11 MR. COHEN: Your Honor, I think we're done looking

12 at the small text, the witness can sit down.

13 THE COURT: All right, you can resume the witness

14 stand.

15 BY MR. COHEN:

16 Q. How many trucking companies -- let me ask you this. You,

17 being Logistics Plus, moves freight with a lot of trucking

18 companies, correct?

19 A. Yes.

20 Q. With respect to Central Transport, understanding that the

21 movement was based on the Central Transport trucking tariff and

22 that you were providing a logistics service to shippers, did

23 you ever take a look at the Central Transport tariff?

24 A. I never read it myself, no.

25 Q. Are you familiar with the term limitation of liability?

55

1 A. I heard it before.

2 Q. You're in the shipping logistics business, correct?

3 A. Yes.

4 Q. You limit your liability, something that is an important
5 thing to do?

6 A. Yes.

7 Q. Why is it important to limit your liability in the
8 transportation business?

9 A. If I'm in the right line here, I think for claim reasons.

10 Q. Right. You know with respect to a claim if a carrier has
11 an appropriate limitation of liability, that will cap the
12 amount of the claim, is that right?

13 MR. KNOX: Objection, calling for a legal
14 conclusion.

15 THE COURT: It's not tied to anything, it's
16 speculative, sustained.

17 BY MR. COHEN:

18 Q. I'd like to direct your attention to Exhibit 3, CT-3, it

19 happens to be in that book again in front of you. If you could
20 look at the first page for a moment, would you agree that this
21 is the Central Transport tariff CTII 100-C, is that what it
22 appears to be?

23 A. Of what I'm seeing, yes.

24 Q. Have you ever looked at this document?

25 A. No.

56

1 Q. Have you ever asked anybody at Central Transport for
2 their tariff?

3 A. I never did, no.

4 Q. The bill of lading that you issued indicates that motor
5 carrier classification or tariff is a part of the governing
6 documents here. Why didn't you want to ever take a look at the
7 tariff?

8 A. Just never had to.

9 Q. Do you know what's in a trucking company tariff?

10 A. Basically I do, yes.

11 Q. What's in there?

12 A. Rules, regulations, standards. I can't verify

13 everything, but --

14 Q. How about limitation of liability?

15 A. Could be.

16 Q. I'd like to direct your attention to -- actually, sir, I

17 think in the original there's a pink tab, turn to where the

18 pink tab is, maybe tell me what the number at the bottom

19 right-hand side is?

20 A. CT0238.

21 Q. If you could turn to CT0237, that's the page I'm looking

22 for. And tell me when you're on that page, sir?

23 A. 0237?

24 Q. Yes, sir.

25 A. I'm on it.

57

1 Q. At the top it says "used articles or commodities,"

2 correct?

3 A. Yes.

4 Q. Because you said you have not read the tariff, I'm

5 assuming you never read this provision in the tariff, is that

6 correct?

7 A. Correct.

8 Q. When you are shipping freight for a customer -- let me

9 ask this. If you're shipping freight for a customer, isn't the

10 liability, the limitation of liability for that freight

11 something important that you want to know?

12 A. I would like to know that, yes.

13 Q. And the reason that you, as the sophisticated logistics

14 professional would like to know that is because you need to

15 know that to properly convey to the shipper what their exposure

16 is if they ship freight, is that correct?

17 A. No, not really.

18 Q. Are you telling us that Logistics Plus had no obligation

19 to inform Accu-Spec of limitations of liability with respect to

20 transportation that Logistics Plus was arranging?

21 A. I would say not.

22 Q. In this arrangement between Accu-Spec and Logistics Plus,

23 who's the transportation expert, Logistics Plus, correct?

24 A. Yes, sir.

25 Q. They're the ones with the knowledge, the people, the

1 manpower, the computers, the know-how to have all the
2 information to help that shipper, correct?

3 A. Yes.

4 Q. You wouldn't expect really a shipper that's a
5 non-sophisticated shipper to know the limitation of liability
6 issues with respect to --

7 MR. KNOX: Your Honor, I'm going to object to that,
8 calls for speculation.

9 THE COURT: I apologize, I missed the question,
10 could you start it again.

11 MR. COHEN: Instead I'll ask a different question,
12 maybe less objectionable, your Honor.

13 MR. COHEN: All right.

14 BY MR. COHEN:

15 Q. Is it fair to say Logistics Plus was a company that had
16 contact with Accu-Spec with regards to arranging for the
17 transportation of this freight?

18 A. Yes.

19 Q. Central Transport didn't do it, right?

20 A. No.

21 Q. George Horetsky didn't call up Mr. Mullen, you did,

22 right?

23 A. Mr. Mullen called me, yes.

24 Q. Whose responsibility was it to make sure that this had

25 proper limitation of liability coverage?

59

1 A. Accu-Spec.

2 Q. You're saying Accu-Spec's job is to ask you what the

3 limitation of liability was?

4 A. To tell us what we're shipping.

5 Q. Mr. Mullen is your father-in-law, right?

6 A. Yes.

7 Q. Why didn't you just ask him what are you shipping?

8 A. I don't ask, I treat him the same as I do anyone. I

9 didn't need to.

10 Q. You're saying because he didn't tell you that was an

11 X-ray machine, that it's his fault if there's a limitation of

12 liability?

13 A. It's Accu-Spec's fault, yes.

14 Q. In this case the tariff of Central Transport on CT0237 is

15 the limitation of liability, do you agree with that?

16 MR. KNOX: Objection, your Honor, again it's calling

17 for a legal conclusion.

18 THE COURT: Sustained.

19 BY MR. COHEN:

20 Q. Let's look at this document, sir. It indicates that

21 "shipments of used articles or commodities will not be accepted

22 by the carrier unless the shipper releases the value to not

23 exceed 10 cents per pound per package or declares a higher

24 value and agrees to pay an additional charge." It goes on to

25 say, "number one, if shipper desires to tender a shipment with

60

1 a value in excess of 10 cents per pound, the shipper must

2 indicate the released value on the bill of lading. Carrier

3 will assess an additional charge of 26 cents per each \$100 or

4 fraction thereof, declared by the shipper in excess of 10 cents

5 per pound." On the bill of lading that you prepared for

6 Accu-Spec by Logistics Plus, was a value declared?

7 A. No.

8 Q. This used articles or commodities item with Central

9 Transport's tariff refers to used articles. Did you ask Mr.

10 Mullen if the machine was new or used?

11 A. No, I didn't.

12 Q. The machine was listed on the document. Why didn't you

13 ask him if it was new or used?

14 MR. KNOX: Objection, machinery is not listed on any

15 document.

16 BY MR. COHEN:

17 Q. I'm sorry, equipment. Because of this limitation of

18 liability, wouldn't it have been important to know if the

19 machine was new or used?

20 A. It would have been important, yes.

21 Q. However, you did not convey anything with respect to

22 limitations of liability issues to Accu-Spec, correct?

23 A. No.

24 Q. Is it fair to say, although, you have a lot of

25 experience, you personally have a lot of experience in

1 transportation, it seems you don't really have much experience

2 with managing liability issues, is that true?

3 A. No, it's not true.

4 Q. You are experienced in managing liability issues?

5 A. Sure.

6 Q. Are you familiar with a document called the National

7 Motor Freight Classification?

8 A. Yes.

9 Q. What is it?

10 A. That's a book that classifies basically everything in the

11 world that you can ship.

12 Q. So everything from tables to X-ray machines, I guess,

13 right?

14 A. Yes.

15 Q. I'm holding up the book National Motor Freight

16 Classification, it's about two-inches thick and is a softcover

17 book, is this pretty much what it is?

18 A. What year is that one?

19 Q. This one is 2004.

20 A. It's a new cover.

21 Q. When you need to know the class of a piece of freight,

22 you consult the National Motor Freight Classification, correct?

23 A. If you need to know one, yes.

24 Q. How many thousands of different types of freight -- let

25 me ask this. There are thousands of different types of freight

1 listed in that book?

2 A. Uh-huh.

3 Q. It's, I don't know, a couple hundred pages, correct?

4 A. Yes.

5 Q. If all you have is a crate, if all you know is that it's

6 a crate, there is no way for you to determine what the

7 classification is without a little bit of guessing, is that

8 correct?

9 A. Little bit of guessing.

10 Q. Now, in this case you testified that you guessed based on

11 the crate, the word crate, the size and the weight, this thing

12 was Class 100, is that correct?

13 A. It was an accurate guess, yes.

14 Q. Now, with respect to those characteristics, they did not

15 include value. Did you know that value is a consideration in

16 the National Motor Freight Classification guideline?

17 A. Yes.

18 Q. Without knowing what was in the crate at all, isn't it

19 possible it could have been classed higher or lower?

20 A. It could have.

21 Q. Did you ask the value from Accu-Spec?

22 A. No.

23 Q. This is in Exhibit 4 in your book, CT-4, you were shown

24 this a moment ago. This is a blow-up of CT-4. This is a page

25 of the National Motor Freight Classification book, correct?

63

1 A. Yes.

2 Q. And this indicates that -- X-ray machines are actually

3 included in here?

4 A. Yes.

5 Q. And there is a value parameter set specifically in the

6 book, is that right?

7 A. Yes.

8 Q. Could be Class 100, Class 150, Class 200 or Class 300, is

9 that correct?

10 A. Yes.

11 Q. There's no way for you to know based on weight, size and

12 crate, first, that it was an X-ray machine and, second, what

13 kind of X-ray machine it was, how valuable it was, correct?

14 A. I knew what the class was of the weight. It's just the
15 way it is. You can figure it out being experienced and in
16 trucking, like I said, I class it 100, it was a Class 100.

17 Q. All right. That's what I'd like to get into, it's very
18 important to classify, what do you mean it's the way it is, why
19 it is the way it is and exactly what is the basis of what your
20 conclusion is?

21 A. Like I said before, it's off of size and weight.

22 Q. That's it, size and weight?

23 A. Size and weight.

24 Q. Do you need to know it's a crate?

25 A. Size, weight, skid, a box, a crate, a bag, a barrel, a

64

1 drum.

2 Q. And why for this crate did you pick 100?

3 A. Because of the size and weight.

4 Q. Okay. If you could turn to the second page in that
5 exhibit, sir, it's the second page of Exhibit 4. Do you see
6 that page, sir?

7 A. Yes.

8 Q. This is the National Classification Committee Value

9 Guidelines, I take it you've never seen this?

10 A. No.

11 Q. There's been testimony that value is a consideration in

12 classifications. Here Class 50 items are listed at maximum

13 average value per pound on the dollar, did you know that?

14 A. No.

15 Q. Did you ever do any investigation to find that out?

16 A. No.

17 THE COURT: Let me counsel at side bar just a

18 second.

19 (At side bar on the record.)

20 THE COURT: This isn't by way of interfering, just

21 keeping this moving along. If this guy got it right for the

22 wrong reasons, what are we spending all this time on this for?

23 MR. COHEN: He got the wrong rate.

24 THE COURT: He got the right rate, he got the 100.

25 MR. COHEN: He got a Class 50 rate. He got this

2 THE COURT: I have an obligation not to waste the
3 jury's time. He came up with the Class 100 on his own, now he
4 told you five times how he did it on the basis of weight and
5 other factors. He got it, by your lights, right initially, but
6 for the wrong reasons, inadequate reasons. But so what.

7 MR. COHEN: I can move this along.

8 THE COURT: All right.

9 (End of discussion at side bar.)

10 BY MR. COHEN:

11 Q. Sir, after evaluating this document and the previous page
12 of CT-4, is it fair to say that value is a factor in
13 determining class?

14 A. Yes.

15 Q. All right, I'd like to go over the logistics, for lack of
16 a better term, how the bill of lading gets to the shipper. You
17 filled out the bill of lading?

18 A. Yes.

19 Q. And then you faxed it to Dage in California?

20 A. Yes, you fax it to the contact, wherever it's getting
21 shipped out of.

22 Q. And then that bill of lading is handed from Dage to the

23 truck driver, who comes and picks up the freight, correct?

24 A. Yes.

25 Q. I'd like to move on to the actual way that you got the

66

1 rate for this shipment. There's been a lot of testimony about

2 how the rate came about to be. I apologize, but I do need to

3 go over this in excruciating detail because of the nature of

4 this. When you first got the call from Mr. Mullen, you were

5 told to get the rate and then you went on to your computer,

6 correct?

7 A. Yes.

8 Q. And you used a Class 100 because you thought that was the

9 right class?

10 A. Yes.

11 Q. And you punched it into your computer, you got the rates

12 for Central Transport?

13 A. Yes, I did.

14 Q. You called up Mr. Mullen, you said I have a rate, it's

15 what, \$900?

16 A. \$900 and some change, yes.

17 Q. He said you can do better, something like that?

18 A. Yes.

19 Q. So you called?

20 A. See if I can try to do better.

21 Q. What did you say to him?

22 A. I said I will try.

23 Q. So you called Mr. Horetsky?

24 A. Yes.

25 Q. He's the local person for Central, is that correct?

67

1 A. Yes.

2 Q. And what specifically did you say to him?

3 A. I just asked him if we could try and get spot quote on a

4 skid coming out of California. It was a new customer for us, I

5 was trying to work out a rate for them.

6 Q. And did he have to call you back or did he give you a

7 rate right there?

8 A. He didn't give me the rate. I got the rate.

9 Q. You asked for a spot quote from Mr. Horetsky?

10 A. Yes.

11 Q. Did he give you a spot quote rate?

12 A. No.

13 Q. He had to call you back?

14 A. No.

15 Q. Okay. What did he say when you said I'd like a spot

16 quote rate?

17 A. We talked for a minute or two, he just basically said I

18 told him the rate I was getting, he said to drop a class to 50.

19 Q. He didn't have to call you back?

20 A. No.

21 Q. And you never told him that was Class 100, did you?

22 A. Yes.

23 Q. Now, in your testimony earlier in your deposition, you

24 usually prefaced what George says with the word basically,

25 basically he said drop it down to Class 50. Basically this is

68

1 what happened. What I'm interested in informing the jury of is

2 exactly the words that came out of Mr. Horetsky's mouth and

3 your mouth during that telephone call. So with respect to the

4 telephone call that you placed to Mr. Horetsky with respect to

5 getting a lower rate, what words came out of your mouth into

6 the telephone?

7 A. I'm going to be honest with you, I can't exactly tell you

8 how it came out. It came out that I have this rate, can he do

9 something better on this rate here.

10 Q. How many times over the course of a week were you asking

11 for rates for customers?

12 A. A lot, 100 to 150. You're asking if I'm calling people

13 to get rates, I'm giving rates?

14 Q. I'm trying to figure out how busy you are with respect to

15 getting or giving rates, either one?

16 A. One hundred to 150.

17 Q. The timeframe for 100 to 150?

18 A. You said a week.

19 Q. A week, okay. Between now and then you would have given

20 thousands and thousands or hundreds and hundreds of, maybe

21 thousands of quotes and asked for quotes, correct?

22 A. Between now and then?

23 Q. Between now and then, yeah?

24 A. No.

25 Q. Between today and when you got this quote, let me ask

1 you -- did you leave Logistics Plus right after the quote?

2 A. Six months after.

3 Q. Okay.

4 A. Five or six months after. Right around that area.

5 Q. In these five or six months, were you getting an giving
6 quotes?

7 A. Yes.

8 Q. Hundreds?

9 A. Hundreds.

10 Q. Is part of the reason it's tough to remember one single
11 quote is because you're really, you're dealing with hundreds of
12 these things, is that fair to say?

13 A. To remember it, yes.

14 Q. I'm asking with regards to actual words that's what you
15 said, you said I can't really remember, correct?

16 A. I don't remember word by word, but I remember what the
17 conversation was about.

18 Q. Now, you said during your testimony on direct with
19 respect to the suggestion that you are the one who asked for a
20 Class 50 rate, you said we can't do that kind of thing, we just

21 don't do that, is that what you said?

22 A. No.

23 Q. What did you say?

24 A. On what part?

25 Q. I'll ask the question again. During your direct

70

1 testimony you testified?

2 A. Direct testimony, you mean today, sir?

3 Q. I'm sorry. During the questioning by Mr. Knox?

4 A. Okay.

5 Q. Actually no, I'm sorry, it was counsel for Accu-Spec.

6 THE COURT: Whoever it was, he was asked an earlier
7 question, say what it was and then ask him whatever you want.

8 MR. COHEN: Thank you.

9 BY MR. COHEN:

10 Q. The question was did you know that Mr. Horetsky testified
11 or testified that you're the one who suggested the Class 50.

12 And you testified, this is where you correct me if I'm wrong, I

13 don't do that, we just don't do that, did you say that?

14 A. I don't know if I said it like that. What was your

15 question?

16 Q. The question is what did you say with respect to the

17 issue of you lowering the classification?

18 A. I was told to lower the class.

19 Q. With respect to your practice of dealing with getting

20 rates and giving rates, you testified that you just don't do

21 that, is that correct?

22 A. I don't do what?

23 Q. You don't knock down the class to get a better rate.

24 THE COURT: This is going nowhere, through no fault

25 of yours and I think through no fault of his.

71

1 BY MR. COHEN:

2 Q. Another way of coming at this, rather than going through

3 that particular valley, that would be good but we're not going

4 to get to the end of it.

5 A. Your Honor, I could literally explain, if it's a Class

6 100, I will not make a decision to change to Class 50, is that

7 basically what you're asking?

8 Q. Yeah, that's what I'm asking?

9 A. I will on my terms change it. The reason is the pricing.

10 If it ends up getting into a Class 100, gets charged for it,
11 the quote is still getting paid at Class 50. No one in the
12 company will change it, has no right to change it on their own.

13 Q. Right after that you testified that classes are brought
14 down and that's just how the business works?

15 A. Yes.

16 Q. So you're saying on one hand you won't do that but that's
17 how the business works, which way is it, does your company
18 agree on misclassifying freight on bills of lading?

19 A. We do what we're told to do. We get the job done. So
20 does Central, so does Holland, so does all the trucking
21 companies. You get it taken care of.

22 Q. In this case the bill of lading you prepared was a Class
23 50 on there, you knew it was Class 100, correct?

24 A. Yes.

25 Q. Is that how you got the job done?

1 A. Yes.

2 Q. Let me show you another exhibit. I direct your attention

3 to CT-6, it's in your book. I believe that was presented to
4 you earlier. This is the invoice effectively from Logistics
5 Plus to Accu-Spec, correct?

6 A. I don't think it's an invoice, it's a quote, yes.

7 Q. This says "quotes are based on information given at time
8 of quote. If variables such as dimensions, class and/or weight
9 change, this quote will no longer be valid." Do you see that?

10 A. Absolutely.

11 Q. When asked about this document, you said today in earlier
12 questioning that's on there because if there's bad info, the
13 deals null and void, if there's a high quote, nothing is valid?

14 MR. KNOX: I think that's a mischaracterization of
15 the testimony, I don't think he used the words null and void.

16 THE COURT: What the testimony is, if they think the
17 predicate for the question is inaccurate, they can, that's what
18 they think of it. If they think it's accurate, the objection
19 is overruled. Start that again.

20 MR. COHEN: Thank you, your Honor.

21 BY MR. COHEN:

22 Q. During early questioning and testimony with respect to
23 this document, you testified that the reason that language is

24 on the quote is because if there is bad information provided,

25 then the quote is null and void. And if the shipper gives you

73

1 bad information, the quote is not valid, is that summary

2 accurate?

3 A. Yes.

4 Q. Did you ever during the course of this transportation,

5 open the National Motor Freight Classification and actually try

6 to get the actual rate, the actual class?

7 A. No, I didn't.

8 Q. I'd like you to look at a document which is marked

9 Exhibit, I believe 13. All right, we've looked at this a

10 moment ago, we were reading the text off the top of this one.

11 This is the bill of lading you prepared for the transportation

12 of the X-ray machine after it was fixed, right?

13 A. No.

14 Q. Was it on the way to being fixed?

15 A. It was on the way to get crated for return to get fixed.

16 Q. On this bill of lading under description, you write

17 "X-ray machine." And the class or rate is now 92.5?

18 A. Yes.

19 Q. I take it you put X-ray machine on there this time around

20 because you knew it was an X-ray machine?

21 A. Yes.

22 Q. And where did you get the 92.5?

23 A. I don't know.

24 Q. Wild guess, anything, you have no idea?

25 A. I don't know why, might even be a misprint, I don't know

74

1 why.

2 Q. I'd like you to look at Exhibit CT-12 for a second.

3 CT-12 is also a Logistics Plus bill of lading, is that correct?

4 A. It's an invoice.

5 Q. I apologize, you're right, it is an invoice. This

6 invoice lists X-ray machine value \$120,000?

7 A. Okay.

8 Q. Did you prepare this?

9 A. No.

10 Q. Now, you realize your father-in-law testified that he

11 never told you to get the cheapest rates?

12 A. I wasn't here yesterday, if that's what was said, okay.

13 Q. Was he wrong?

14 A. Yes.

15 Q. Why do you think he testified that way?

16 MR. KNOX: Objection.

17 THE COURT: Sustained.

18 MR. COHEN: I'm very close to being finished with
19 this witness, may I have one moment to examine my notes. I'd
20 like to move the introduction of Exhibit 13.

21 THE COURT: It's admitted.

22 THE COURT: CT-13?

23 MR. COHEN: Yes, your Honor, thank you. I have no
24 further questions for this witness.

25 THE COURT: Anything else of this witness?

75

1 MR. KNOX: Just very quickly one question.

2 REDIRECT EXAMINATION

3 BY MR. KNOX:

4 Q. Real quickly, the Class 50 rating that was placed on the
5 bill of lading, did Mr. Horetsky okay that fact that was going

6 to be put on the bill of lading?

7 A. Yes.

8 MR. KNOX: Thank you.

9 MR. DELANEY: Nothing here, your Honor.

10 MR. COHEN: One more, your Honor.

11 RECROSS-EXAMINATION

12 BY MR. COHEN:

13 Q. Mr. Horetsky gave you a quote for a Class 50 crate, he

14 didn't okay transportation of a Class 100 item at Class 50,

15 correct?

16 A. He didn't give me a quote. You keep saying a quote, a

17 quote is the numbers of the price. He never gave me a price.

18 We just talked about lowering it to 50, that's what I did off

19 of my database. There was no quotes between me and George.

20 Q. He didn't authorize a Class 50 rate for a Class 100

21 product?

22 A. Yes, he did.

23 MR. COHEN: Okay.

24 THE COURT: Now, you're excused. Do you have any

25 other witnesses?

1 MR. KNOX: Judge, I'd like to call Mr. Jim Berlin to
2 the stand.

3 THE COURT: Before we start with the witness, let me
4 see you at side bar briefly.

5 (At side bar on the record.)

6 THE COURT: Just by way of streamlining this, this
7 jury is about ready to fall over on their chairs. Give me an
8 offer of proof on this guy, what is he going to cover that
9 hasn't been covered?

10 MR. KNOX: He has background, obviously, this is his
11 company, he's CEO. He's going to talk about the inspection,
12 the damage.

13 THE COURT: I'm not saying you can put him on. It's
14 not up to me to say that without objection, unless there is an
15 objection, what is he going to say that materially advances the
16 ball and tells the jury something they haven't already heard
17 from your perspective?

18 MR. KNOX: Mr. Fanzini did cover a lot of ground to
19 some extent, but off the top of my head --

20 THE COURT: As you go through the testimony, be
21 sensitive to duplication, all right.

22 MR. KNOX: All right.

23 (End of discussion at side bar.)

24 THE COURT: Go ahead, Mr. Knox.

25 MR. KNOX: Thank you, your Honor.

77

1 JAMES BERLIN, LOGISTICS PLUS WITNESS, SWORN

2 DIRECT EXAMINATION

3 BY MR. KNOX:

4 Q. Good morning, Mr. Berlin.

5 A. Good morning.

6 Q. You had indicated to me you have a tough voice. If I

7 could, again, what I told Mr. Fanzini, keep your voice up and

8 slow down for the court reporter's and jury's sake.

9 A. I have my dad's voice and I'm from New York City, I have

10 two strikes.

11 Q. Mr. Berlin, the judge is the jury's best friend here,

12 we'd like for you to streamline this, Mr. Fanzini covered a lot

13 of ground, so I don't want to duplicate too much with you. But

14 I do want to touch on a few key points. Before I get to that,

15 I'd just like to have you identify who you are and a little bit

16 about your background. What is your full name?

17 A. James Richard Berlin.

18 Q. And where do you live?

19 A. In Erie.

20 Q. Are you affiliated with Logistics Plus?

21 A. I'm the CEO, yes.

22 Q. At Logistics Plus?

23 A. At Logistics Plus company, based in Union Station.

24 Q. What does that company do?

25 A. We move freight around the world for different customers.

78

1 Q. And do you have a background, prior to starting with

2 Logistics Plus, in the shipping and freight industry?

3 A. I do. This is what I do, I started out as a kid working

4 the dock. I drove a truck for 10 years or so. I got asked by

5 one of my bosses about becoming a dispatcher. Then I became

6 the supervisor terminal manager. And about 10 years ago I

7 started Logistics Plus.

8 Q. How many employees back in 2003 did Logistics Plus have?

9 A. Maybe 60 or 70 back then or close to it, right.

10 Q. How many do you have today?

11 A. About 110.

12 Q. Mr. Berlin, are you familiar with a company called

13 Accu-Spec?

14 A. Yes, I am.

15 Q. Are you familiar with the specific transaction that was

16 at issue in this case?

17 A. I am now, yes.

18 Q. How did you become familiar with this transaction?

19 A. I don't remember exactly, some notification of a claim

20 not being paid.

21 Q. Did you have any role in preparing the bill of lading?

22 A. No.

23 Q. Did you have any role in talking with Central Transport?

24 A. No, not until later.

25 Q. When did you first have contact with anybody from Central

1 Transport regarding this claim?

2 A. I don't remember exactly, I think it was around the

3 holidays of that year. Around Christmas time, I don't remember

4 exactly.

5 Q. What was the nature of your contact?

6 A. Well, they said there was some damage that happened to
7 this crate that that was transported, I tried to help Chris out
8 by calling the higher ups --

9 THE COURT: Chris who?

10 THE WITNESS: Chris Fanzini, I'm sorry. And one of
11 the higher ups in Central that I know. I called him up,
12 e-mailed him, said we need to get this thing paid.

13 THE COURT: You're talking too fast.

14 THE WITNESS: That we need to get this thing paid.

15 BY MR. KNOX:

16 Q. When you say the higher ups, are you referring to Central
17 Transport?

18 A. Yes.

19 Q. Do you remember specifically who you were dealing with?

20 A. I dealt with a gentleman by the name of Jim Rafferty.

21 Q. What was the nature of your communication with Mr.
22 Rafferty?

23 A. That it's clear that this project was damaged in transit
24 in your car, and as always the carrier pays the claim. Now,

25 there's issues how much he paid, I understand that. It's

80

1 always between the carrier and the shipper.

2 Q. Mr. Berlin, have you, as CEO of Logistics Plus, ever had
3 to confront a claim like this in the past few years?

4 A. Never in my life.

5 Q. Mr. Berlin, what is your understanding of Central
6 Transport's reason for denying this claim prior to litigation?

7 A. I think Accu-Spec was requesting the full \$120,000 value
8 of it. And that seemed to be exorbitant. When you get a
9 claim, you try to mitigate it, you try to make it less
10 expensive than the total. You do what you can to fix it,
11 reduce the cost of it. They were trying to get Accu-Spec to
12 agree, you know, not to 120, it was something less than. That
13 was the only issue.

14 Q. Do you see the document that I have up on the screen,
15 CT-0008?

16 A. Yes, I see that.

17 Q. Have you seen that document before?

18 A. Yes, I have.

19 Q. After seeing that document, what was your understanding

20 of why Central Transport was denying this claim?

21 A. That they had clear receipt, delivery receipt.

22 THE COURT: Keep your voice up.

23 THE WITNESS: They had clear delivery receipt.

24 BY MR. KNOX:

25 Q. Any other reason, does that second paragraph talk about

81

1 anything else?

2 A. Just no notification of any discrepancy at time of

3 delivery, no record of any discrepancy with the shipment while

4 in our possession.

5 Q. Based on your experience in the shipping and freighting

6 industry, does that type of reasoning for denial of a claim,

7 does that end the story in your mind?

8 A. No.

9 Q. Why not?

10 A. There's more to it. In this case Jim signed it, even

11 though the damage is there, it was remiss on Jim's part, he

12 really should hold the driver there, wait a minute, there is a

13 crack here, there is a crack there, don't go anywhere until we
14 find out the extent of the damage. Sometimes that does happen.
15 They quickly called up and let Chris Fanzini know that there
16 was damage. And George Horetsky went down there. So it would
17 be similar to if there is a receipt that says the crate is
18 damaged. But they didn't.

19 Q. But the fact is that they didn't, does that cause a big
20 problem in your mind?

21 A. No, it remains similar, has nothing to do with this
22 story.

23 Q. Mr. Berlin, to accommodate your time, let me jump
24 around --

25 THE COURT: Don't apologize, just go right to the

82

1 question.

2 BY MR. KNOX:

3 Q. Mr. Berlin, Mr. Carlson said something interesting the
4 other day in testifying, he said that pricing didn't matter to
5 him. Were you present in the courtroom when he said that?

6 A. Yes, I was.

7 Q. Have you had any conversations with Mr. Carlson about

8 pricing and using Logistics Plus?

9 A. No, never.

10 Q. He said pricing doesn't matter, what is your thought?

11 A. Well, I kind of laughed. As a business owner he knows

12 that pricing always matters.

13 Q. And particularly with regard to Logistics Plus, does

14 Logistics Plus serve a role in terms of getting good prices for

15 customers?

16 A. Yes, the company can call Central or anyone else, then

17 get the rate for this shipment. Generally indicates like this,

18 they call us, we do more business so we can get a better rate

19 for them. That's why they involve us in that.

20 Q. Mr. Berlin, did you have an opportunity to view some of

21 the photographs of the damage to the crate in this case?

22 A. Yes, I did.

23 Q. In fact, the one picture that I have up there on the

24 screen, I believe that's Exhibit 9, have you seen that picture?

25 A. Yes.

1 Q. In looking at the photographs regarding the damage to the
2 freight and damage to the crate here -- strike that, let me
3 back up. Based on your experience, have you had occasion to
4 view damaged freight as a truck driver in any other capacity?

5 A. Yes, many times.

6 Q. In fact, have you in fact damaged freight through your
7 career?

8 A. Not many times, but yes.

9 Q. How have you damaged freight in the past?

10 A. Things drop or a fork goes into the skid in front. Lot
11 of handling moving around the world.

12 Q. Have you had any experience in packing freight?

13 A. Yes, I have.

14 Q. What is the nature of your experience in packing freight?

15 A. Well, when I was a trucker, we used to pack things
16 occasionally. Most recently, we started a warehouse in Erie a
17 couple years ago, and as Mr. Carlson, when things get crazy I
18 put on my blue jeans and go to work.

19 THE COURT: Slow down, I've got to ask you, I'm not
20 trying to harp on you, it's for your mutual benefit, he has to
21 get everything down. You're like at the end of the
22 Indianapolis 500, you're getting around that last turn, slow

23 down. Go ahead.

24 BY MR. KNOX:

25 Q. Mr. Berlin, based on your experience as a truck driver, a

84

1 forklift driver, experience in packing firsthand, experience

2 with damaged freight, did you reach an opinion based on your

3 review of the photographs and the evidence in this case, as to

4 what might have happened here?

5 A. Yeah, it looks like rough handling. As somebody

6 testified, just in a truck there's lots of bouncing, I saw

7 films of this. It bounces and on turns the freight moves a

8 little bit. And that's one thing that impacts the fragility of

9 the freight or the safety of the freight. The other thing is

10 handling, picking it up, moving it. When these things go from

11 California to, I don't know how many, George would know better,

12 three, four, five terminals, that's a long way. Pulls in, gets

13 pulled off one truck put on another truck. It's put on one

14 truck, put another truck. So there is handling to it. And the

15 freight has to be protected against normal bounces of the

16 trunks and equipment, stones, things like that. As well as the

17 operator that moves the freight usually protects it against
18 that. In fact, I can tell you the warehouse we were at,
19 there's like a foam machine, it's a couple barrels, has two
20 handles coming out, you spray that foam, it's liquid foam. All
21 of a sudden it just fills up around the thing, put it on the
22 top of it, you seal it. And you've got like a styrofoam
23 protection where molds, like the thing molds itself, whatever
24 is in there. That's common, we do that a lot in the warehouse.
25 Q. If that type of foam packing was used here, Mr. Berlin,

85

1 would that have changed anything in this case?

2 A. Yeah, you can drop it and probably not hurt it. I think
3 this wasn't dropped --

4 THE COURT: I didn't hear what you said, tell me
5 again what you just said?

6 THE WITNESS: I said I don't think this thing,
7 doesn't seem like this tipped over, the tip and tell would have
8 shown it was tipped over. But it could have been bumped and
9 dropped and hit. And the foam would have stopped it from
10 moving anywhere. It takes up all the empty space in the

11 container so there's no place for the freight inside that

12 container to move.

13 BY MR. KNOX:

14 Q. Mr. Berlin, I believe you're aware of that discrepancy

15 between Mr. Fanzini and Mr. Horetsky?

16 A. Yes.

17 Q. About what they said happened here in this conversation?

18 A. Yes.

19 Q. I believe Mr. Horetsky said Central Transport never

20 changes the class of an item, did you hear him say that?

21 A. Yes.

22 Q. Based on your experience, do carriers in fact change the

23 class, for whatever reason, in setting up transactions?

24 MR. COHEN: Objection, your Honor.

25 THE COURT: What's the nature of the objection?

86

1 MR. COHEN: This is hearsay, doesn't speak to the

2 issue in the case.

3 THE COURT: He said based on his experience does

4 Central Transport do it, is that the question.

5 MR. KNOX: If that's what -- I can't remember, I'll
6 reask the question.

7 BY MR. KNOX:

8 Q. Based on your experience in dealing with various
9 carriers, Mr. Berlin, have you ever seen an instance where
10 carriers have in fact changed the class of an item?

11 THE COURT: Sustained, it's irrelevant.

12 BY MR. KNOX:

13 Q. Mr. Berlin, Attorney Cohen asked Mr. Fanzini about this
14 tariff, I believe Mr. Fanzini said he didn't -- any tariff. Do
15 you know whether your employees routinely explain all the terms
16 of the tariff documents to customers that are shipping?

17 A. It's funny. It's there, I've seen it now in writing,
18 I've been in trucking for 30 years, never read the fine print
19 before. I think that's more for the lawyers. The employees
20 aren't told to read -- the customers are not. It's just
21 something lawyers look at in a case like this to point it out.

22 Q. Do you know how many pages are in this tariff?

23 A. Hundreds for each carrier. There's dozens, if not
24 hundreds of trucking companies, they all have this. There are
25 books three inches thick. They may have slightly different

1 verbiage, basically, it's the same thing. Everyone has their

2 own.

3 Q. Mr. Berlin, Central Transport has raised an issue here

4 the X-ray machine is perhaps used versus new. Have you heard

5 all the testimony in this case, including the testimony of the

6 Dage employee, Mr. Fisher?

7 A. Yes, I have.

8 Q. Based on your entire understanding of this freight, do

9 you have an opinion as to whether or not this X-ray machine is

10 new or used?

11 MR. COHEN: Objection, your Honor, there's

12 absolutely no foundation for this witness to know whether this

13 machine is new or used. He is the Logistics Plus president.

14 His opinion would be completely without basis.

15 THE COURT: It's overruled.

16 BY MR. KNOX:

17 Q. Mr. Berlin, do you deal with new versus used in

18 shipments?

19 A. Yes.

20 Q. Knowing what you know about this item, the facts of this

21 case, do you have an opinion as to whether this is new or used?

22 A. I think I did some quick math after I got out of here

23 when I heard the testimony, it had I think 20 hours of use on

24 it, and it does 600 hours a year for decades. Even two

25 decades, 20 years, 12,000 hours. This machine's life is a

88

1 minimum of 12,000 hours, so 20 hours on it, which is .0016

2 percent of its life has been used. And I just bought a Volvo

3 with 4,000 miles on it, I got a new car deal, new car

4 warranty --

5 THE COURT: Excuse me, just answer the question.

6 THE WITNESS: I'm sorry.

7 BY MR. KNOX:

8 Q. Mr. Berlin, has Logistics Plus dealt with Accu-Spec

9 before this transaction in the shipping business?

10 A. Yes, we have.

11 Q. Do you deal with Accu-Spec after the shipping of goods in

12 this case?

13 A. Yes, we do.

14 Q. Does Logistics Plus deal with Accu-Spec in shipping other
15 goods after Logistics Plus was sued?

16 A. Yes, we do.

17 Q. Mr. Berlin, I'm showing you three documents, very
18 quickly --

19 MR. COHEN: Your Honor, can we see the court at side
20 bar for a moment?

21 THE COURT: All right. Take the exhibit off the
22 screen.

23 (At side bar on the record.)

24 MR. COHEN: I object to the exhibit, never seen it,
25 totally new.

89

1 THE COURT: Let me see it. What is it?

2 MR. KNOX: An invoice from Accu-Spec. Bill of
3 lading from Accu-Spec.

4 THE COURT: What is the relevance, what does it have
5 to do with this case?

6 MR. KNOX: Just a description of a generic item used
7 in this case. Obviously, be an issue --

8 THE COURT: Sustained.

9 (End of discussion at side bar.)

10 BY MR. KNOX:

11 Q. Mr. Berlin, if Mr. Mullen had told Mr. Fanzini that what
12 was being shipped here was an X-ray machine, moreover a
13 \$120,000 X-ray machine, would Logistics Plus have done anything
14 differently here?

15 A. Yes.

16 Q. What would they have done here?

17 A. There are many other ways to move freight. If you want
18 to move it the cheapest way, you do one thing. If you want to
19 move it the most careful way, you do another thing.

20 Q. What would be the most careful way to move freight?

21 A. In that case what we do is instead of putting it on a
22 company like Central Transport -- where it's in a truck with a
23 lot of other freight, and it's moved around from terminal to
24 terminal as it makes its way across the country. The safest
25 way is to get what they call a dedicated truck. Maybe a

1 14-foot van, like a laundry truck you might see on the road or

2 a straight truck. You put it in that truck and the guy closes

3 the door and never gets touched again until the same driver

4 delivers it. That's like \$3,000, close to \$3,000 to \$4,000

5 would be normal for that.

6 MR. KNOX: Thank you, I have nothing further.

7 CROSS-EXAMINATION

8 BY MR. DELANEY:

9 Q. Mr. Berlin, my name is Patrick Delaney. As to your

10 knowledge, that option was never given to Accu-Spec, is that

11 correct?

12 A. Yes, that's correct.

13 Q. You mentioned that the first awareness you had of this

14 claim was around the holidays of 2003?

15 A. I think so.

16 Q. By that point in time, were you aware that Accu-Spec had

17 filed and amended claim with Central Transport reducing the

18 amount of damages it was seeking?

19 A. I don't remember. I just don't remember.

20 Q. You called someone at Central Transport, is that right?

21 A. Called or e-mailed.

22 Q. But you corresponded with Central Transport?

23 A. Yes.

24 Q. Who was the person you corresponded with?

25 A. His name is Jim Rafferty.

91

1 Q. Do you know where he's located?

2 A. In Michigan, Warren, Michigan.

3 Q. And what did you say to Mr. Rafferty?

4 A. Basically, pay this claim.

5 Q. You felt the claim needed to be paid?

6 A. Yes.

7 Q. Okay. And that was because the goods were damaged in

8 transit?

9 A. Yes.

10 Q. And what response did you get from Mr. Rafferty?

11 A. Well, if I remember right, he kind of followed up to tell

12 some people locally get moving on this thing, it has to be

13 resolved somehow.

14 Q. Did you hear anything more?

15 A. He also said Accu-Spec was being unreasonable because

16 they wanted \$120,000. We're not going to pay for value on

17 something that might be mitigated.

18 Q. This is in the holiday season of 2003?

19 A. The best I can remember.

20 Q. Let me just show you what has previously been identified

21 as CT-10, this is Central Transport's exhibit, and this is an

22 amended claim loss, let me just make sure I got the sticker

23 here, this is CT-10. Let me show you at the top, it has

24 Central Transport loss and damage claim and it's dated 4/28/03;

25 do you see that?

92

1 A. Yes, I do.

2 Q. And what was the amount of the claim at that point in

3 time?

4 A. \$37,752.40.

5 Q. We know now that this amended claim was even before the

6 equipment was shipped to England. But in the holiday season at

7 the end of 2003, am I correct Mr. Rafferty from Central

8 Transport is still saying we're denying this claim because they

9 want \$120,000?

10 A. I know he said that, I'm not sure I remember the holiday,

11 I'm not sure of the time. But that was the message, yeah, to

12 their claim.

13 Q. Did anyone from Central Transport ever contact you in an
14 effort to investigate the details of this claim that was being
15 made by Accu-Spec?

16 A. I don't think so.

17 Q. Did you ever talk to Mr. Cackowski?

18 A. No.

19 MR. DELANEY: That's all the questions I have, thank
20 you.

21 CROSS-EXAMINATION

22 BY MR. COHEN:

23 Q. Good morning, Mr. Berlin.

24 A. Good morning.

25 Q. My name is Jeff Cohen, I'm the attorney that represents

1 Central Transport. You've testified regarding the bill of
2 lading which was used in this case, and you testified that even
3 you as the president of the company didn't read it, is that
4 true?

5 A. I never had read it.

6 Q. Sorry.

7 A. Yes, I never read it.

8 THE COURT: Sir, keep your voice up. Okay, go

9 ahead.

10 BY MR. COHEN:

11 Q. Just to get this straight, this is a Logistics Plus

12 document at CT-1, correct?

13 A. Yes.

14 Q. I guess if you're the president and haven't read this,

15 you haven't told any one of your employees to read your own

16 document?

17 A. Right.

18 Q. Makes things a little dangerous if you don't read your

19 own documents --

20 A. It's a standard document.

21 Q. Isn't it a little dangerous to send out documents,

22 contracts and agreements if you don't know what they say?

23 A. It's been around for a hundred years.

24 Q. You agree that the Central Transport tariff was

25 incorporated into the terms of the transportation agreement, is

1 that fair so say?

2 A. I don't know I can say that.

3 Q. Did you hear Mr. Fanzini's testimony?

4 A. Yes.

5 Q. Did you see the exhibits on the screen there?

6 A. I did.

7 Q. Did you come to any different conclusion that the Central

8 Transport tariff was not interrelated into your bill of lading

9 that you drafted?

10 A. I don't know. I assume it's true, but I don't want to

11 say it's true, but I don't know that.

12 Q. With regard to used articles on the commodities provision

13 in the Central Transport tariff, it seems that it's somewhat

14 easy to get additional coverage, all you have to do is charge

15 26 cents per each \$100 or fraction thereof, declared by the

16 shipper in excess of 10 cents per pound. By my calculation

17 \$312 would have covered that, is that true?

18 A. Yes.

19 Q. Wouldn't that be a reasonable thing for Chris Fanzini to

20 tell Mr. Mullen?

21 A. No.

22 Q. It would not be reasonable for him, he shouldn't have
23 told him that?

24 A. Nobody said it was used until two weeks ago.

25 Q. You testified regarding whether this X-ray machine was

95

1 new or used earlier. Have you ever worked for an X-ray
2 manufacturer?

3 A. Never.

4 Q. Did you ever sell X-ray machines?

5 A. Never.

6 Q. Did you ever go to see a trade show with X-ray machines?

7 A. No, not once.

8 Q. Have you ever gone to an X-ray machine manufacturer's
9 showroom?

10 A. No.

11 Q. Did you hear Mr. Fisher testify about the X-ray machine?

12 A. I did.

13 Q. Did you hear him testify that it's a used demo machine?

14 A. I think you tripped him up when you said that.

15 Q. You think he was tripped up?

16 A. I do.

17 Q. You think he got confused and said the wrong thing?

18 A. I think you led him to say that.

19 MR. DELANEY: I'm going to object, I think the
20 record reflects that counsel said used. The witness did not.

21 MR. COHEN: The record reflects the witness said it
22 was a used demo machine.

23 THE COURT: You know the nice thing about having a
24 jury in the box is they get to determine what the record
25 reflects, not Mr. Delaney or Mr. Cohen. Overruled, go ahead.

96

1 BY MR. COHEN:

2 Q. You did hear there was a \$15,000 discount between the new
3 one and the demo?

4 A. I did.

5 MR. COHEN: Thank you, very much for your patience,
6 sir.

7 THE COURT: Anything else of this witness?

8 MR. KNOX: Nothing further, judge.

9 MR. DELANEY: No, your Honor.

10 THE COURT: You're excused.

11 MR. KNOX: Those are all the witnesses for Logistics

12 Plus.

13 THE COURT: All right. Members of the jury, we've
14 got some cleaning up to do. I'm going to send you to lunch
15 now, which means you're going to have a little bit longer lunch
16 than normal. Try to back by 1 o'clock. You can step out, I'm
17 going to stay on the bench here for a second.

18 (Whereupon, the Jury was dismissed from Courtroom C
19 at 11:35 a.m.)

20 THE COURT: All right, we have some matters that we
21 need to take up. But let's take about a five-minute recess,
22 then I'll come out without the jury and address those things.

23 (Recess from 11:36 a.m.; until 11:41 a.m.)

24 MR. DELANEY: Your Honor, at this time we would
25 respectfully request that the court grant a Rule 50 motion for

1 judgment as a matter of law. This case is controlled by the
2 Carmack Amendment, 49 U.S.C. Section 14706. That statute

3 requires the plaintiff to demonstrate that it delivered cargo
4 to a carrier, motor carrier, in good condition. That the cargo
5 was returned or arrived at its destination in damaged
6 condition. And that there were damages suffered by the shipper
7 or the consumer of these services.

8 THE COURT: Are you asking, to be clear, are you
9 asking for a declaration that a prima facie case has been
10 established as a matter of law?

11 MR. DELANEY: I am. And that the affirmative
12 defenses that the defendants carry the burden on, have not been
13 proved.

14 THE COURT: Talk to me about those?

15 MR. DELANEY: Let's go back to the Carmack
16 Amendment. It makes both the freight forwarder and the motor
17 carrier responsible. And it has a section that talks about the
18 allocation of damage between them. There's a stipulation that
19 we entered into, even before the jury, even before opening
20 statements, that Logistics Plus is the freight forwarder. So
21 they are exposed to liability under the Carmack Amendment. We
22 have Mr. Berlin acknowledging in his testimony this morning
23 that he believes that the claims should be paid. He made that
24 assertion to Central Transport. And when I asked him why he

25 made that assertion, because he believed the goods were damaged

98

1 in transit.

2 THE COURT: Let me ask you this and I'm going to let
3 the defendants speak for themselves, the bad packaging defense,
4 that all things being equal, assuming it could be proved up,
5 does Accu-Spec concede that is a legitimate defense on the
6 Carmack Amendment?

7 MR. DELANEY: We acknowledge that a legitimate
8 defense under the Carmack Amendment is damage by the shipper.

9 THE COURT: If the shipper was shipping crystal
10 and/or wanted his crystal crated in an unprotected crate so
11 that the crystal could roll freely, it strikes me that the
12 motor carrier could not be responsible for that. That's really
13 the defense that's been pressed here, why isn't that a jury
14 issue?

15 MR. DELANEY: What you have here is uncontested
16 testimony that we have a two-and-a-half ton piece of equipment
17 that's constructed of steel and lead. And there is no way the
18 packaging -- it's in the record, wooden packaging. The

19 packaging itself could not have caused the damage that has been
20 demonstrated in the photographs. We have lead and steel walls
21 that have --

22 THE COURT: I'm denying that.

23 MR. DELANEY: If you're denying that aspect of it
24 based on an admission by Mr. Berlin, then my motion still is
25 that we have made out a prima facie case.

99

1 THE COURT: There are other issues I want to take up
2 while you're there. Actually, by way of revisiting issues now
3 that the evidence is in. The question of duty, new versus
4 used.

5 MR. DELANEY: Yes. New versus used. Would trigger
6 the limitation of liability contained in the tariff that
7 Central Transport has. We determined that we are not, I
8 believe the court's ruling is we are not a principal and that
9 Logisitics Plus is not the agent, our agent for purposes of
10 this transaction. I believe that agency relationship would be
11 a necessary element to foist upon Accu-Spec any limitation of
12 liability.

13 THE COURT: You mean on the theory you didn't have
14 notice of it?

15 MR. DELANEY: That's right. In addition to that,
16 the case law is very clear that the shipper has to have, must
17 have been provided alternative rates so that there could be an
18 intelligent decision to go with the limitation of liability.
19 And there is no evidence in the record that the shipper was
20 given such alternative rates.

21 THE COURT: Does Accu-Spec have a position, one way
22 or the other, by way of follow-up to my previous in limine
23 ruling, which I then withdrew in lieu of permitting record
24 development as to whether or not this equipment, as the record
25 stands, is new or used as a matter of law?

100

1 MR. DELANEY: I do, your Honor. We would agree with
2 Mr. Berlin's characterization of this. I think when we had the
3 in limine discussion, we talked about in the colloquial sense
4 of new versus used. Used the category that Central Transport
5 has chosen to select in its tariff. It has not defined what
6 used is. The confused testimony in this case is that this

7 machine may have been put to use no more than 20 hours in a
8 situation in which it is in the hands of the manufacturer being
9 used, if you will. Only to demonstrate to potential customers
10 how it functions. That doesn't constitute the kind of use one
11 would think of colloquially since as being a used piece of
12 equipment. In addition, Mr. Berlin got it correct in terms of
13 percentage of useful life to which this product may have been
14 put prior to the damage that it suffered in transport.

15 THE COURT: All right. Let's start with Mr. Cohen
16 here first.

17 MR. COHEN: Your Honor, which particular issue would
18 you like me to address first?

19 THE COURT: Come on up to the podium, I'll tell you
20 where we'll start. Let's start with the first question here.

21 Hasn't a prima facie case been made out as a matter of law; if
22 not, why not?

23 MR. COHEN: Thank you, your Honor. With respect to
24 a prima facie case under the Carmack Amendment, I really don't
25 think anybody is going to dispute that it arrived in a damaged

1 condition. It's just --

2 THE COURT: That's one of the requirements.

3 MR. COHEN: Contested really. The good -- origin is
4 a different story.

5 THE COURT: I'm sorry.

6 MR. COHEN: The first requirement of the Carmack
7 Amendment is the freight be delivered to the carrier in good
8 condition. That's the element I'm addressing.

9 THE COURT: Did Central receive the cargo in good
10 condition?

11 MR. COHEN: Correct. There is no testimony
12 whatsoever from anybody who either packed the crate or loaded
13 the crate on the truck. There is no testimony that there was
14 anything but a signed bill of lading. Very same case, we have
15 a signed delivery receipt. The plaintiff can't have it both
16 ways. Circumstantial evidence to a certain degree can be used
17 to establish that first element, your Honor. However, here we
18 believe the circumstantial evidence is not enough. Certainly
19 would provide us an opportunity to argue to the jury that the
20 freight was not delivered in good condition.

21 THE COURT: And certainly you have the right to do

22 so. If you were to argue that to the jury that when you got
23 it, it already looked like it had been dropped off the Empire
24 State building, what would you point to in the record, though,
25 that would support a reasonable inference?

102

1 MR. COHEN: That when we got it, it was damaged?

2 THE COURT: Yes.

3 MR. COHEN: The purpose of a prima facie case is for

4 the plaintiff to prove it was delivered in good condition.

5 With respect to facts, we will argue to the jury, we would

6 argue that the truck driver at the origin, you can see it in

7 the crate. The damage to the outside of the crate -- the crate

8 is big, he could have looked at it -- the truck driver could

9 see one side is pushed out. The only other thing is a picture.

10 So this box's damage was pretty noticeable inside, you can see

11 it's crunched in there. It could have got on the truck in

12 damaged condition, therefore, we believe a prima facie case has

13 not been met, certainly as a matter of law.

14 THE COURT: At some point, I guess it depends on how

15 I rule, but if I rule it goes forward, it just becomes a

16 tactical decision as to whether you really want to argue to the
17 jury it was damaged before you got it. But that would be a
18 tactical decision.

19 MR. COHEN: It would not be my number one argument,
20 an argument I believe we're entitled to.

21 THE COURT: I understand your point on that. Do I
22 take it right that insofar as substantive affirmative defenses
23 are, if you will, of the defendant's view, it is for one that
24 it wasn't properly packed?

25 MR. COHEN: Yes, your Honor, that is one of the

103

1 defenses.

2 THE COURT: What else is there?

3 MR. COHEN: The other defense is Central Transport
4 will relate to the limitation of liability.

5 THE COURT: Where, is that new versus used?

6 MR. COHEN: Yes.

7 THE COURT: What evidence on the record is there
8 that Accu-Spec was ever given notice of this and had an
9 opportunity to request a different rate, because I can't find

10 none?

11 MR. COHEN: My understanding from the court's
12 earlier ruling and from the evidence, all communication between
13 Central Transport and Logistics Plus. Central Transport never
14 communicated with Accu-Spec, of course.

15 THE COURT: Doesn't appear that way.

16 MR. COHEN: Except for the driver backing up. He
17 backed up, dropped it off, that's it. With respect to the
18 limitation of liability, here the limitation of liability
19 would, we believe that Accu-Spec would be bound through the
20 actions of Logistics Plus.

21 THE COURT: No, there's not, as a matter of law I
22 already told you they're not their agent. How else could they
23 be bound?

24 MR. COHEN: With respect to the limitation of
25 liability, your Honor, the ruling is based on an agency

1 issue --

2 THE COURT: I ruled on that already.

3 MR. COHEN: Then as to the limitation of liability,

4 Logistics Plus would be bound by the limitation of liability

5 and they, therefore, Accu-Spec would collect from Logisitics

6 Plus, not from Central Transport. Central Transport would be

7 responsible for \$528, at 10 cents per pound. However, because

8 the limitation of liability was an agreement the Central

9 Transport entered into --

10 THE COURT: Too fast, Mr. Cohen, you're talking way

11 too fast.

12 MR. COHEN: Because limitation of liability was part

13 of the agreement that Central Transport entered into with

14 Logistics Plus, Logisitics Plus and Central Transport, that

15 agreement is set and bound. Recovery would be due to a failure

16 of anything of a limitation of liability is squarely due to the

17 failure of Logistics Plus to convey this information to

18 Accu-Spec. They didn't even read their own bill of lading.

19 THE COURT: Is there anything you want to tell me by

20 way of follow-up to Mr. Delaney's comments about used?

21 MR. COHEN: Yes, your Honor, I would like to. I

22 would like to present that to the jury first, your Honor. With

23 respect to --

24 THE COURT: You may not have a chance to present

25 that to the jury, Mr. Cohen.

1 MR. COHEN: Yes.

2 THE COURT: I'm asking you now, how do you survive
3 as a matter of law on the question of used?

4 MR. COHEN: As a matter of law, Mr. Fisher from Dage
5 testified that this was a used demo machine. He testified that
6 there was 20 hours of use, prior representation in the briefing
7 was 12 hours. We're up to 20. There's 20 hours of use, the
8 expected usage is 600 hours a year. Comes out to two weeks of
9 use, I believe 50 hours a month is less than two weeks of use.
10 That, most importantly, besides the actual manufacturer saying
11 the words used.

12 THE COURT: That's irrelevant. It doesn't even
13 define what used means. You know that.

14 MR. COHEN: Well, then, the other factor, I think it
15 is important for the court to consider the fact there is
16 \$15,000 discount, again, between a new one and a demo model.
17 You don't get a demo model, you don't get a new one for \$15,000
18 less because it's used.

19 THE COURT: Is it accurate to say that it was

20 Central Transport's position here, through its own witness or
21 witnesses, that the reason that the tariff appears and the
22 reason it has the used language was inserted was to prevent
23 what had apparently happened over the years, and that is that a
24 carrier such as Central, were that shippers were trying to
25 stick them with damage of old machines and so as a prophylactic

106

1 measure to protect themselves essentially to reimburse people
2 for natural depreciation, wear and tear, they insert the word
3 used. Now this machine, this shipper here wasn't trying to
4 claim any damages that would have or old damage that would have
5 been typical of an old X-ray machine, were they?

6 MR. COHEN: No. Your Honor, can I argue further?

7 THE COURT: Yes. You can tell me anything you want,
8 but it strikes me that the use of the term used here, as you
9 are attempting to use it, is at odds with the theory of the
10 term as articulated by your own witnesses?

11 MR. COHEN: The language of the provision in its
12 plain English is clear. We arguing is clear. And the
13 application of that to the facts of this case is also clear.

14 That the machine was used as a demo machine that falls under
15 the category of used, despite the partial reasoning that it was
16 expressed for the inclusion of this item. The plain language
17 is clear and could have, this whole situation could have been
18 prevented if there was an additional payment made. So we
19 believe the facts establish that the machine is used.

20 THE COURT: Are there any other defenses, besides
21 the packaging defense and the one we just talked about, the
22 limitation of liability, that is germane to our discussion?

23 MR. COHEN: Yes, that one other defense, your Honor,
24 and that was with respect to the misclassification of the
25 freight. In this case there is undisputed testimony that this

107

1 was Class 100 freight. Logistics Plus knew, well, Logistics
2 Plus knew it and knowing that --

3 THE COURT: It looks everybody knew it?

4 MR. COHEN: I don't say no, not everybody. I would
5 say that's for the jury. But with respect to the bill of
6 lading. That was prepared by Logistics Plus, they wrote Class
7 50 on there, they knew it was Class 100. They provided a false

8 contract, a false document. It was a material
9 misrepresentation, or a fraudulent misrepresentation. Which
10 would permit the voiding of the contract. And that in this
11 case, Logistics Plus would be responsible for the full damage,
12 Central Transport would be responsible for no damage.

13 THE COURT: All right. Before I swing to Mr. Knox,
14 then let me ask Mr. Delaney and clear up a few loose ends, then
15 we can get to Mr. Knox. First of all, with respect to the
16 first prong that this is a prima facie case, he says you
17 offered no evidence that this was in good condition when it
18 left the shipper's control. In other words, when Central got
19 it.

20 MR. DELANEY: Your Honor, I would refer the court to
21 the Beta_Spawn_v._FFE_Transportation_Services, 250 F.3d 218,

22 it's a Third Circuit, 2001 case.

23 THE COURT: What does it say?

24 MR. DELANEY: Bill of lading. That a clean bill of
25 lading is not sufficient to establish the condition of goods if

1 the goods are not visible or open to inspection. But the
2 shipper may rely on other reliable evidence, direct or
3 circumstantial, to establish the good condition of freight.
4 Then in Footnote 8 the Third Circuit says, by the way, we're
5 not saying that bill of lading isn't good enough if you sealed
6 the crate. By the way we're not saying that a closed crate is
7 a sealed crate. If it's not locked, banded or somehow wrapped
8 in a fashion that prevents the shipper from looking at the
9 goods. Now, I know they probably would argue in testimony we
10 don't typically do that. But the Third Circuit in this case is
11 saying look, the obligation is on the motor carrier to take
12 that precaution. In addition, there was testimony by Mr.
13 Horetsky if there is damage to the crate or the freight, that
14 the trucker won't pick it up. We have a clean bill of lading.
15 That we would suggest under these circumstances would
16 demonstrate a prima facie case. In addition to that, we have
17 the testimony of Mr. Fisher, who explained that there is a
18 process for reporting damage if it occurs prior to the shipment
19 going out. And that there was no such record, either verbal or
20 written.

21 THE COURT: Assuming that it goes to the jury,
22 assuming this jury were to conclude that Central Transport

23 received it in good condition, Mr. Cohen. The next question
24 logically would be, by way of a prima facie case as far as
25 cargo damaged during the time it was in transit. There can't

109

1 be any doubt but that it was. So isn't it true that by your
2 lights the only issue really for the jury relative to a prima
3 facie case is when you got it, meaning Central, it was in good
4 condition because it couldn't be damaged anyplace else other
5 than in transit?

6 MR. COHEN: For the second element I think we
7 determined they arrived in damaged condition.

8 THE COURT: Really in terms of a prima facie case,
9 that is an issue, by your lights, that needs to be submitted to
10 the jury, is that right?

11 MR. COHEN: Your Honor, with respect to prima facie,
12 we believe two or three elements need to be submitted to the
13 jury.

14 THE COURT: What are the other ones?

15 MR. COHEN: Damages.

16 THE COURT: You're quite right. Because there is a

17 dispute on damages or there's not a dispute whether it was
18 damaged, there's a dispute on the amount of damage, is that
19 correct?

20 MR. COHEN: Your Honor, the dispute is
21 foreseeability of damage.

22 THE COURT: I've ruled on foreseeability. Let me
23 make this very clear. Let me just say this, this is off the
24 point a little bit. This is a \$46,000 case, \$47,000 case. I'm
25 now moving into my 12th year on this court, I've never seen a

110

1 case like this. I do not say this, this is not accusatory
2 toward anyone, any party or toward the lawyers, the lawyers
3 fees alone in this case are far exceeding the value of the
4 claim. I've never seen anything like this. I've never seen
5 anything like it. Now, I got that off my chest. You do not
6 dispute, do you, Mr. Cohen, by virtue of those photographs,
7 exterior and interior, that the thing was damaged in some form
8 or fashion during transit, assuming that the jury were to
9 conclude that you got it in good condition, it was banged up,
10 is there a dispute about that?

11 MR. COHEN: It was received in good condition and it
12 arrived in damaged condition.

13 THE COURT: The real question here is the
14 reasonableness of the damages. For instance, should they have
15 shipped the thing all the way to England. Was it reasonable to
16 have somebody come back here -- isn't that right?

17 MR. COHEN: We also would like to test the
18 reasonableness of damages.

19 THE COURT: You're going to have a chance to do
20 that. All right -- do you have a position on this
21 misrepresentation?

22 MR. DELANEY: Yes. That, once again, because we are
23 not the principal and Logistics is not the agent, our agent, if
24 there was a misrepresentation, there was fraud, we wouldn't be
25 bound by it, number one. If you remember the key testimony

111

1 about misrepresentation from Central Transport's standpoint was
2 that of Mr. Horetsky. I asked Mr. Horetsky if there was
3 anything that would have prevented him from insisting upon
4 information concerning the freight, that the character of

5 freight itself. Now, you can't have justifiable reliance on a
6 misrepresentation or on fraud. If the information is otherwise
7 available to you. You can't sit back and say well, I've been
8 duped, simply because you don't have the equipment.

9 THE COURT: Let me hear what Mr. Knox has to say.
10 With respect to misrepresentation, are you making some kind of
11 motion on that?

12 MR. DELANEY: I would, your Honor. To the extent
13 that anyone is suggesting that Accu-Spec is bound by the
14 misrepresentation or is bound by some fraud, I would make a
15 Rule 50 motion as well.

16 THE COURT: All right. Go ahead, Mr. Knox.

17 MR. KNOX: Judge, if I could kind of go out of order
18 and follow-up on that last point.

19 THE COURT: What's your position on
20 misrepresentation, because they're accusing you of
21 misrepresenting?

22 MR. KNOX: With respect to the argument that there
23 was a fraudulent misrepresentation, that aspect of it I think
24 is pretty easy. That issue really has never even been pled.

25 THE COURT: Yes, it has. The contention is that --

1 well, maybe I shouldn't say it has. It's in the points for
2 charge that ask that --well, however it does or does not appear
3 in the answer, if you will, I'm interested now on the merits
4 based on what we've heard. They have a misrepresentation claim
5 against Logistics?

6 MR. KNOX: I don't think he does. We obviously have
7 a difference of opinion with respect to Mr. Horetsky v. Mr.
8 Fanzini. And, again, in many ways it's a question -- when we
9 talked about this in one of the pretrial conferences, it's a
10 difference in price here. He's saying it voids the entire
11 contract, they wouldn't have entered into it had they known it
12 was Class 100. That's a misrepresentation, if you want to call
13 it that. It doesn't really have any affect. Clearly, they
14 would have entered into this contract, which was a Class 100 on
15 the crate. There is no misrepresentation there.

16 THE COURT: Anything else you want to tell me
17 quickly?

18 MR. KNOX: With respect to a prima facie case, I
19 would join in Central Transport's argument on when we make

20 mention in our oral argument, closing argument, I think your

21 Honor is correct, that is a tactical decision that perhaps I'm

22 not going to be allowed to draw my attention to. With respect

23 to the defenses, our position, your Honor, as you know --

24 THE COURT: What is your defense?

25 MR. KNOX: Number one, we were not negligent. I

113

1 think it's pretty clearly we proved that through the witnesses,

2 who agreed with our position.

3 THE COURT: I'm not jumping out there insomuch as to

4 the relevancy associated around in front of the jury under the

5 Carmack Amendment prolonged this case for a day. You have to

6 understand that you are barking up a completely irrelevant tree

7 when you talk about your potential lack of negligence being

8 tied in any form or fashion to the fact you never touched the

9 goods. Of course, you never touched the goods. You're liable

10 as a matter of law under the Carmack Amendment, so forget about

11 this negligence thing. I'm not going to let you argue that.

12 MR. KNOX: That is a legal defense, your Honor.

13 That we are allowed to prove we are not negligent in an act of

14 the shipper. If we prove that, we don't pay.

15 THE COURT: You unfortunately are tied to the
16 actions of the carrier. That's the way it works. The only way
17 I see logistics beating the wrap, if you will, if you and
18 Central can convince the jury that something that, for
19 instance, goods were not in good condition when Central got
20 them. But beyond that, what is the conduct at issue in the
21 case insofar as you're concerned that focuses the light on your
22 reasonable care, such that a jury would ever have to be
23 interested in your negligence?

24 MR. KNOX: If the plaintiff meets its burden, which
25 if I had to guess they probably will, I think meet their burden

114

1 on a prima facie case, the burden then shifts to us, we have to
2 prove two things. Number one, that we're not negligent. And I
3 am going to be very clear in my argument to the jury that if
4 you think we're not negligent, that doesn't relieve us of
5 reliability. We have to prove two things. But we do have to
6 prove that we were not negligent. We have been arguing various
7 things. Not touching the freight really is a big component.

8 The other aspect of that as the shipper is two fold. Number
9 one, obviously, a packing defense. I think there is some, Mr.
10 Cackowski testified with great authority and Mr. Berlin
11 testified with great authority on that issue. With the act of
12 the shipper here, Accu-Spec's theory is that they played a
13 role, a factual role in causing this damage to occur by not
14 telling us that this X-ray machine was worth \$120,000. By not
15 telling us it was an X-ray machine all. Everybody who has
16 testified in our case has said that if we had known this, this
17 whole thing would have been shipped entirely differently.
18 We're conceding that point. They bear some blame on this
19 point. Whether the jury believes that or not is obviously for
20 the jury. That is our defense.

21 THE COURT: Just so the record is clear, Mr. Delaney
22 made a motion on misrepresentation, are you making any motion
23 on that?

24 MR. KNOX: I would make that motion as well, judge.

25 THE COURT: All right. Come on up, Mr. Cohen.

1 MR. COHEN: Your Honor, I just want to point out one

2 other thing. With respect to the shipper suggesting that they
3 had no knowledge or should be held completely free of
4 responsibility for knowledge of the shipping agreement, really,
5 49 U.S.C. Section 13701 requires that a shipper request a
6 tariff. That's what that provision indicates. I want to make
7 sure the court had that information.

8 THE COURT: Thank you. Let me get some orders on
9 the record here.

10 ORDER

11 First, with respect to the Rule 50 motion, judgment
12 as a matter of law. That's denied. That's the motion made by
13 Accu-Spec. And the reason it's denied is twofold. One, with
14 respect to that aspect of a prima facie case, there is in my
15 opinion as least a colorable issue of fact, to wit, whether
16 Central Transport received the cargo in good condition. If the
17 jury were to find this as we set out in the jury form, if they
18 were to answer that yes, they will not be required to also
19 answer yes or no as to whether the cargo was damaged or during
20 the time it was in transit. Because there's absolutely no
21 evidence to the contrary. We would then get on to, as you'll
22 see later, to the damage questions.

23 With respect to the revisited issue of new versus

24 used. It is my opinion, now having heard the evidence, and it
25 was my opinion when I ruled on the motion in limine, that this

116

1 piece of equipment as a matter of law is not used. And I based
2 that opinion on two major factors. One is the testimony from
3 the representative of Central, which explained the reason or
4 reasons for the use of this tariff and the term used. And that
5 was so that it would not get stuck with the shippers claiming
6 that old equipment had been damaged in transit when it in fact
7 the old equipment had the bumps and bangs that come along with
8 being old. The comment was also made that old equipment, by
9 the testimony to the effect that old equipment tends to damage
10 or is more susceptible, can be more susceptible to damage in
11 transit. That is the underlying theory or rationale on the
12 term for restriction on limitation of liability as used
13 equipment. As Central understands it. With that as background
14 and the uncontradicted testimony here as to use, confirms what
15 I believe pretrial, and that is use was so incredibly de
16 minimus that it can't be used equipment within the meaning of
17 the tariff. So that defense is eliminated.

18 With respect to the issue of misrepresentation.
19 Several points. One, fraud, whether intentional or negligent
20 has to be proved by clear and convincing evidence. That's the
21 standard, has not even been close to having been met here
22 insofar as the fraud claim is concerned. But more
23 fundamentally as a substantive matter, the fraud claim hasn't
24 been made out. And that is because from the testimony of
25 Central's own witness, there was no testimony from which the

117

1 jury could conclude that a misrepresentation in fact was made.
2 Central's witness never indicated that he was even informed
3 that the Logistics person even knew what the equipment was, and
4 the evidence suggests that essentially what happened here was
5 there was no misrepresentation and the Central Transport's
6 person -- relied on nothing, agreeing to classify and took a
7 blind faith leap. Which then goes to the second prong of the
8 fraud claim, which is justifiable reliance. There's absolutely
9 no evidence of justifiable reliance here at all. Third, and
10 somewhat off the point, but the uncontradicted evidence also
11 establishes here that this equipment would be treated no

12 differently if it was a 50 or if it was 100. And so the fraud
13 defense is eliminated.

14 The only defense that I'm going to permit the
15 defendants to go to the jury on is this question of packaging.
16 Which in my view is a jury issue. On that point, though, bad
17 packaging alone, which does not seem to be a matter of law
18 within the case as is true of any defense of this nature. The
19 jury is going to have to not only find that was packaged
20 improperly, but that it was a causative factor in the machinery
21 being damaged. In other words, by way of example, if the claim
22 is that a piece of china was improperly packaged, but it was
23 dropped off the Empire State building, all the proper packaging
24 in the world wouldn't have prevented it from cracking when it
25 hit. So they're also going to have to find it was a causative

118

1 factor.

2 Now, what we do have you can start to read this over
3 the lunch hour. We have the proposed jury charge, which I want
4 you to review. We do have interrogatories to the jury, which
5 we are going to change slightly, given what I said. But I want

6 you to be reading these over the lunch hour. And then we may
7 be a little bit late getting started with the jury. But at
8 least we're going to get our charge pinned down. We'll get
9 together around 1 o'clock then. All right.

10 MR. KNOX: Judge, if I could ask one question. One
11 of our defenses, acts of the shipper, as indicated in terms of
12 the conduct of Accu-Spec. I think that's pretty clear under
13 the case law.

14 THE COURT: Tell me that again?

15 MR. KNOX: One of our defenses is, your Honor, as
16 you know the acts of the shipper, which not only includes the
17 packaging component, but the acts of Accu-Spec.

18 THE COURT: By not telling you what it was?

19 MR. KNOX: Clear --

20 THE COURT: Why isn't that a legitimate defense?

21 MR. DELANEY: Why didn't they ask us. There was no
22 apparent attempt to deceive anyone, we told them it was
23 equipment, they characterized themselves as the experts, and we
24 are not a sophisticated shipper of equipment. I don't see how
25 that is causative to the actual damage that occurred.

1 MR. KNOX: We're not saying it was fraud. We're
2 experts in what, mind reading. They tell us it's one crate,
3 it's a piece of equipment. We write it down verbatim on the
4 bill of lading, this whole thing blows up. If they don't do
5 that, we're not here. That is the key issue for us.

6 THE COURT: I've never seen two outfits run so
7 rapidly relative to a small claim and yet throw thousands and
8 thousands, somebody is responsible for this claim. Somebody.
9 And it's mindboggling to me.

10 MR. KNOX: Your Honor, as an aside, if they just
11 sued one of us, I think it would be a lot easier.

12 MR. DELANEY: Now it's our fault.

13 MR. KNOX: I didn't say that.

14 MR. DELANEY: Judge, if I could talk about the
15 substance of what was just suggested. To repeat, we are not
16 the experts. We hire these people, we don't withhold any
17 information, that was their request. And we give them what
18 information we have. Interestingly, Logistics own person
19 classified it as a Class 100. That's an X-ray machine, if you
20 remember the record.

21 THE COURT: How it would be shipped --

22 MR. DELANEY: Remember we had a discussion, he got
23 the right class for the wrong reasons. So what are we talking
24 about.

25 MR. KNOX: We're talking about an X-ray machine.

120

1 We're talking about value. If this is what this thing is, they
2 should have told us.

3 THE COURT: If they told you it was an X-ray
4 machine, your guy would have classed it as a 100, just like he
5 classed it without knowing it was X-ray machine.

6 MR. KNOX: Twofold. \$120,000 X-ray machine.

7 THE COURT: So what?

8 MR. KNOX: To the extent of the freight, our
9 witnesses have testified very credibly they would have done
10 things completely differently, put it on a dedicated truck, air
11 freight, bubble wrapped, they should have moved it by itself.

12 MR. DELANEY: Class 100 is a large book in the
13 National Motor Carrier Freight classification, Class 100, and
14 an X-ray machine with no greater value than \$30 per pound.

15 With this freight that would make it \$150,000.

16 THE COURT: I'll think about this issue over the
17 noon hour.

18 MR. KNOX: It's very important to us, your Honor.

19 THE COURT: I appreciate that. I know how important
20 it is. One last word, Mr. Cohen.

21 MR. COHEN: Thank you, your Honor. With respect to
22 the ruling regarding the argument about fraud, are you ruling
23 Central Transport is not able to make that a motion that
24 intentional material misrepresentation makes a contract
25 voidable?

121

1 THE COURT: Yes. Let me make it clear here. Well,
2 because I didn't. There is no evidence, in my opinion, of
3 intentional or negligent misrepresentation in this case at all.
4 So I'm not going to let you make any argument about that.

5 MR. COHEN: With respect to a citation, for the
6 record -- 49 U.S.C. 13710.

7 THE COURT: That is notice to shipper of the tariff.

8 MR. COHEN: With respect to the tariff, your

9 Honor --

10 THE COURT: That's now irrelevant, I've ruled as a
11 matter of law it's not used equipment.

12 MR. COHEN: Respectfully, just for the record, thank
13 you.

14 THE COURT: All right, we're in recess.

15 (Luncheon recess from 12:20 p.m.; until 1:18 p.m.)

16 THE COURT: Before we start talking about the
17 proposed charge, I'm am going to include a charge on
18 substantial factor in that. Because it strikes me that insofar
19 as the inadequate packing defense is concerned, it's not enough
20 they find it was improper, really the term should be, it says
21 inadequate, we're going to change it to improperly. If you
22 find it was improperly packaged, then you will have to find
23 that the improper packaging was a substantial factor in
24 producing the damage. That having been said, we'll just go
25 around the table. Let's first go to Mr. Delaney on the charge?

122

1 MR. DELANEY: Your Honor, on the charge I have no
2 comment.

3 THE COURT: Which is another way of saying you have

4 no objection?

5 MR. DELANEY: No objections.

6 THE COURT: Let's go to Mr. Knox, then we'll swing

7 over to Mr. Cohen.

8 MR. KNOX: Judge, very briefly, on page 3, last full

9 paragraph, it says Central Transport, or the freight forwarder,

10 Logistics Plus, must avoid individual liability for damages --

11 if they can prove --

12 THE COURT: The shipper caused the damage. In other

13 words, you think that should be, not to put words in your

14 mouth, but made more case specific. In other words, only if

15 they can prove that the shipper inadequately packaged the

16 equipment and that the inadequate packaging was a substantial

17 factor in causing the damage, is that what you're saying?

18 MR. KNOX: Well, two things. The case law, the

19 Third Circuit and elsewhere, is very clear. Again, our defense

20 is a two-prong defense. We have to show that we were not

21 negligent. And that the shipper caused the damage. I think

22 the shipper caused damage is actually fine.

23 THE COURT: All right. In other words, the shipper

24 caused the damage is just another way of saying shipper didn't

25 package the material, right?

123

1 MR. KNOX: Again, your Honor, it's going to be one
2 of our main arguments, the act of the shipper here, Accu-Spec,
3 and their failure to tell us this was --

4 THE COURT: I see no evidence at all of record -- I
5 wanted to take this up with you one more time. You're saying
6 this, if Accu-Spec told you that it was X-ray equipment, rather
7 than just 5,020 pounds of equipment, right, if they would have
8 told you that it was X-ray equipment, which they didn't --

9 MR. KNOX: If they would have told us it was
10 \$120,000 X-ray equipment.

11 THE COURT: All right. That it is more likely than
12 not that the damage would not have occurred, is that how it
13 goes?

14 MR. KNOX: Correct.

15 THE COURT: If the evidence suggests and it does
16 without really any contradiction that I can see, if the
17 appropriate classification was 100 for this, regardless of its
18 value, are you saying it wasn't 100?

19 MR. KNOX: You just don't need 100, you need to know
20 that it's 100 and \$120,000 and an X-ray machine. All of that
21 together puts us on notice that hey, whoa, we need to do
22 something differently here.

23 THE COURT: What would have been done differently
24 here or what does the evidence suggest would have been done
25 differently, which would have produced, from which a jury could

124

1 find, without speculating, that the machine would not have been
2 damaged?

3 MR. KNOX: Two things, the testimony of Chris
4 Fanzini and Jim Berlin, the guys with the most experience here
5 in driving trucks, driving forklifts, saying this absolutely
6 should have gone on a dedicated truck, air lifted with bubble
7 wrap, separate and apart from all the other freight, it's
8 exceptional freight. They both say that. I think it's up to
9 the jury to determine whether or not that plays a serious role
10 here. It's our contention that it did. We wouldn't be here if
11 they had told us that this is a \$120,000 machine.

12 THE COURT: You weren't with the bubble wrapper

13 anyways?

14 MR. KNOX: We would not have called Central
15 Transport to send this on a normal truck. We wouldn't have
16 been involved with bubble wrapping, yes, you're right. Our
17 services are to arrange the proper transportation.

18 THE COURT: Mr. Delaney, what do you have to say
19 about this?

20 MR. DELANEY: This business about knowing it was
21 \$120,000, the evidence demonstrates from the exhibits, the
22 National Motor Freight Classification book, that a Class 100 is
23 not only an X-ray machine, but it's an X-ray machine of a
24 particular value, \$30 per pound. That would put this machine
25 at \$150,000. And that's the class that Mr. Fanzini came up

125

1 with. So this is simply, I believe, a specious argument to try
2 to avoid liability. We didn't misrepresent to anyone. We
3 didn't cause the damage by misclassification. They could have
4 handled it as an X-ray machine Class 100. And we heard the
5 truck drivers and we heard Mr. Horetsky say Class 100 or Class
6 50, we don't handle it any differently. So I don't know how

7 there's a causal relationship between our absence of telling
8 them it's an X-ray machine at \$120,000, and the physical crush
9 that occurred to this particular machine.

10 MR. KNOX: Just because something is Class 100
11 doesn't mean it goes on a dedicated truck or another truck.
12 You have to have both factors involved. You need to know the
13 full picture. They didn't give us the full picture here.
14 Without a doubt if they tell us that, we're not here. I don't
15 think it could be any clearer.

16 THE COURT: Well, it could be a lot clearer. I
17 mean --

18 MR. DELANEY: We're not, I'm sorry, judge -- we're
19 not the experts. We don't ship this sort of thing, we hire the
20 experts, and they ask us for information, we give it. There is
21 no evidence that we --

22 THE COURT: Here's the other thing, this doesn't
23 really run at all to the merits of the argument, one way or the
24 other, it's to the viability of the position. But you have an
25 indemnity claim over as against Central anyways, don't you?

1 MR. KNOX: Yes. But we don't even need to go there,
2 your Honor, if we're not held liable. In conversations with
3 Attorney Cohen throughout this litigation, I fully anticipate
4 them to appeal this case if they lose.

5 THE COURT: I would think they would take this case
6 to the U.S. Supreme Court.

7 MR. KNOX: We're along for the ride for another year
8 and a half on this thing. This is crazy. I guess I would just
9 respectfully ask your Honor, that clearly is a proper issue for
10 the jury. I mentioned it in my opening. I don't know why --

11 MR. DELANEY: Your Honor, I don't know of any case
12 law that suggests this kind of argument. If counsel is aware
13 of any case law under the Carmack Amendment that the
14 interaction between the freight forwarder and the shipper, in
15 terms of information that passes back and forth, can be called
16 a cause of the damage, I'd like to hear about it.

17 MR. KNOX: There is very little case law on freight
18 forwarder litigation at all, on a number of issues in this
19 case. It's clearly an act of the shipper.

20 THE COURT: Look it, my ruling on it is this.
21 There's been testimony that the thing was originally classified

22 as 100, based upon the equipment and I think the weight or size

23 or something like that. That was apparently sufficient.

24 Number two, the uncontradicted testimony in this case is

25 equipment would be handled the same, whether it's at 100 or

127

1 it's at 50. With all respect, you've already testified.

2 Number three, in my opinion, as between the shipper and a

3 freight forwarder, the freight forwarder can't shift the duty

4 to the shipper to ferret out all the details. If they feel

5 that they don't have enough, they can inquire. And, number

6 four, the fourth reason why I'm not letting it come in is on

7 the issue of damages, because as to whether or not it would

8 have changed anything, it is entirely and completely

9 speculative. So that's my ruling on that. Beyond that, is

10 there anything else in the charge, Mr. Knox, that you want to

11 call to my attention?

12 MR. KNOX: So that I just don't get lost -- my

13 initial comment was that the language from the Third Circuit

14 and other case law --

15 THE COURT: I can't hear you, neither can he.

16 MR. KNOX: Just as to my first point that the
17 language in the case law that they were not negligent, have
18 that precede the words that the shipper caused the damage.
19 Issuing that two-prong factor I think needs to be spelled out.

20 THE COURT: I'm going to get off this, but this
21 falls under the category of looking a gift horse in the mouth.
22 I'm not sure there's any evidence that Logistics was negligent,
23 what evidence is there?

24 MR. KNOX: Exactly.

25 MR. DELANEY: If I may speak to that. He's correct,

128

1 the case law puts the burden, it doesn't require the shipper to
2 show negligence. But it does require the freight forwarder and
3 the motor carrier to show the absence of negligence.

4 THE COURT: All right.

5 MR. DELANEY: And that the damage was caused --

6 THE COURT: Tell me one more time what words should
7 be inserted there, by your view?

8 MR. KNOX: Before damages, as if they can prove,
9 number one, they were not negligent. And, number two, that the

10 shipper caused the damage.

11 THE COURT: All right. Anybody have a problem with
12 that as a statement of law?

13 MR. COHEN: Your Honor, if I may.

14 THE COURT: You may, but first tell me do you have a
15 problem with that change.

16 MR. COHEN: Yes.

17 THE COURT: All right, come on up.

18 MR. COHEN: I believe that Central Transport's
19 position is that the language in that sentence should read --

20 THE COURT: In other words, is that the sentence
21 we're beginning with?

22 MR. COHEN: Actually, starting on the second,
23 paragraph that starts, one, Accu-spec, read that along to make
24 it clear. Once Accu-Spec, the shipper, establishes that the
25 equipment was given to Central Transport --

129

1 THE COURT: Mr. Cohen, you're going just too fast.

2 MR. COHEN: I understand. I'll slow down, I
3 apologize. Once Accu-Spec, the shipper, establishes that the

4 equipment was given to Central Transport in good condition,
5 returned from Central Transport in damaged condition, and the
6 amount of money damages which Accu-Spec incurred, only means by
7 which the motor carrier, Central Transport, or the freight
8 forwarder, Logistics Plus, can avoid liability or damages is if
9 they can prove -- if they can prove that the packaging was a
10 cause of the damage.

11 THE COURT: That's an incorrect statement of the
12 law. It would be, and I'm going to change it partially
13 consistent with what you said. If they can prove -- this is
14 how it's going to be. That the manner in which the X-ray
15 equipment was packaged -- what was the word I used before --
16 the manner in which the X-ray machine was packaged was improper
17 and that the packaging was a substantial factor in causing the
18 damage. What else?

19 MR. COHEN: Your Honor, with respect to the second
20 to last paragraph, where it reads in this case you have heard
21 evidence, you have heard reference to the bill of lading, the
22 bill of lading is a document used in the shipping industry. It
23 is an acknowledgment by a motor carrier that it has received
24 certain goods. And it is effectively a contract for
25 transportation of those goods. I don't know that is necessary

1 to be included at all. Because right now, through your prior
2 rulings, the bill of lading is pretty much out of the case.

3 THE COURT: Insofar as it relates to the tariff?

4 MR. COHEN: And I believe that we moved to have this
5 removed.

6 THE COURT: Does anybody have any objection to me
7 removing the verbiage about the bill of lading, does it add
8 anything, Mr. Delaney?

9 MR. DELANEY: I didn't catch up with you, your
10 Honor.

11 THE COURT: Bottom of page three, top of page four.

12 MR. DELANEY: I don't have any objection to removing
13 that.

14 THE COURT: How about you, Mr. Knox -- my view is
15 the less the jury hears in a short amount of time the better,
16 as long as it's accurate?

17 MR. KNOX: So you're suggesting taking that out,
18 your Honor?

19 THE COURT: Yes. The discussion about the bill of

20 lading.

21 MR. KNOX: I don't think I have a problem with that.

22 THE COURT: We'll take it out. What else, Mr.

23 Cohen?

24 MR. COHEN: Your Honor, while I'm standing here,

25 would you also like to hear our position with respect to the

131

1 interrogatories?

2 THE COURT: Yes. Well, are you done -- one thing at

3 a time, are you done with the charge?

4 MR. COHEN: With respect to the charge, with all due

5 respect, understanding your Honor's prior rulings, we would

6 move for the admission of the charge we've submitted to the

7 court earlier before those rulings.

8 THE COURT: All right, that's denied.

9 MR. DELANEY: Your Honor, I understand what you're

10 going to do with substantial factor, I'd like to just preserve

11 an objection.

12 THE COURT: To what?

13 MR. DELANEY: I believe that there's case law that

14 suggests that the defense of shipper damage has to be solely,
15 and result solely from an act of the shipper. I can't cite you
16 to a case, all I'm doing is preserving the objection.

17 THE COURT: Well, you've got a law firm back there
18 that ought to be able to tell you.

19 MR. DELANEY: I'm searching, but --

20 THE COURT: In lieu of any case law which suggests
21 to the contrary, actually, I have a law clerk that ought to be
22 able to tell me, too, he's a lot closer. All right, we'll look
23 at that. Go ahead, Mr. Cohen.

24 MR. COHEN: Are you ready to move to the
25 interrogatories?

132

1 THE COURT: Yes, let me pull them up here, grab
2 them. Go ahead.

3 MR. COHEN: The interrogatories break out into two
4 separate questions the issue of inadequate packaging. We
5 believe that that to be most sufficiently handled by the jury
6 in one interrogatory question.

7 THE COURT: In what respect?

8 MR. COHEN: Instead of asking separately was the
9 cargo inadequately packaged by the shipper, not by Accu-Spec,
10 if we're going to do that.

11 THE COURT: Hang on a minute. I'm sorry, start that
12 all over again.

13 MR. COHEN: Thank you, your Honor. With respect to
14 the interrogatories there are, number two and number three. I
15 believe that can be most efficiently handled by the jury in one
16 interrogatory.

17 THE COURT: What would you suggest?

18 MR. COHEN: I would suggest it would say if the
19 cargo was inadequately packaged by the shipper, was lack of
20 proper packaging a factor in causing the damage to the cargo?

21 THE COURT: Then it doesn't let them pass on the
22 first question as to whether it was improperly packaged, it
23 just takes them right into causation, is that right?

24 MR. COHEN: Well, that would pull it all together,
25 yes.

1 THE COURT: That doesn't make any sense.

2 MR. COHEN: Number four, your Honor, is the
3 interrogatory with respect to the reasonableness of the
4 damages. It reads "was it reasonable for the plaintiff, after
5 discovering that the cargo was damaged, to have the damage
6 inspected by a representative of the manufacturer from
7 England?" We would move that that be changed to reflect
8 inspected in the United States. This is the man, Mr. Dunn, he
9 wrote an e-mail, it said looks totaled, you better ship it
10 back, I'm going to cancel my trip. Then they flew him out
11 anyway. We'd like to argue that if you wanted to inspect it,
12 sure, you would have gone to England when you wouldn't have --

13 THE COURT: You can argue that, that's the way it's
14 going to stay. What else -- I have a question, it's my own
15 interrogatory form. Six and seven, you'll see, we've broken
16 out damages for both, "what amount, if any, is plaintiff
17 entitled to recover from Central Transport?" "What amount, if
18 any, is plaintiff entitled to recover from Logistics Plus?"
19 As I look at that, that doesn't make sense to me. Does that
20 make sense to you or do you have some other suggestion?

21 MR. COHEN: Well, there has to be a break point, it
22 says "proceed to the next question" -- if it was packaged

23 inadequately --

24 THE COURT: Wouldn't this be true. That obviously
25 there can't be different amounts of awarded against Logistics

134

1 and Central. But by all of this -- if Logistics is found
2 liable, does it have a claim against you as a matter of law?

3 MR. COHEN: I don't believe so.

4 THE COURT: You don't believe so. What do you say
5 about this -- how should I set this up?

6 MR. DELANEY: I think that the jury simply ought to
7 be asked one question. What is the amount of the actual loss
8 suffered by Accu-Spec. I think that the Carmack Amendment
9 makes both of the defendants liable. They haven't made
10 cross-claims. There's an apportionment section of the Act, but
11 there aren't any cross-claims filed. I don't know if they
12 contend apportionment can occur here or if they intend to
13 litigate it later. But I think I get a judgment against both
14 of them if the jury comes in with any amount of money damages.
15 THE COURT: So you're suggesting that I just mold --
16 well, sort of mold the verdict, in other words -- well, what do

17 you say, Mr. Knox?

18 MR. KNOX: Your Honor, if I may. I would venture,
19 your Honor, that as a matter of law we do have a claim over
20 Central. If you look at the apportionment subsection, 49,
21 14706(b), all we have to do is we have to show that the loss or
22 injury occurred with the carrier over whose line or route -- is
23 entitled to recover from the carrier over whose line or route
24 the loss or injury occurred. So we proved that that loss or
25 injury occurred here with Central Transport, I don't think

135

1 anybody disputes that.

2 THE COURT: Mr. Cohen, do you have any words of
3 wisdom on six and seven; obviously, it would be unusual to have
4 a trial without having the jury, after having heard three days
5 of testimony, the ability to bring in a verdict against
6 somebody?

7 MR. KNOX: We would prefer to have the apportionment
8 done here.

9 THE COURT: What does that mean, what does
10 apportionment mean -- are you talking about in the context of

11 joint tortfeasors?

12 MR. DELANEY: Well, they're not joint tortfeasors,
13 they're statutory jointly liable. If the jury returns a
14 verdict, I believe that I have the right to a judgment,
15 Accu-Spec has a right to a judgment against both. We can only
16 collect once, but we can choose to collect against one or the
17 other.

18 THE COURT: Well, if you collect against Central,
19 then it moots the point about contribution?

20 MR. DELANEY: It sure does.

21 THE COURT: I'll tell you what I'm going to tell the
22 jury. Then no harm no file. I'm going to have -- let me just
23 think about this. Isn't it true as a matter of law that the
24 jury can't find one party liable without finding both parties
25 liable?

136

1 MR. DELANEY: Under this set of facts, yes.

2 MR. KNOX: Again, your Honor, that provision in the
3 apportionment statute is all we have to prove is that the loss
4 or injury occurred --

5 THE COURT: That doesn't mean that you can't be
6 found liable, that has to do with your claim over. What I'm
7 going to do with the jury, they're going to have a line for
8 both. They will be told that whatever amount -- I think
9 they're going to be told two things. If you find that Central
10 Transport is liable, you must also find that Logistics is
11 liable. And if you find them both liable, you must find them
12 liable in the same amount. But there will only be one
13 recovery. And then the issue of -- then we'll take up this
14 question -- it's not up to the jury to declare as a matter of
15 law -- apportionment is the wrong term, it's not up to the jury
16 to declare as a matter of fact that you have a claim over as
17 against Central. I can declare that as a matter of law, which
18 I probably would do.

19 MR. COHEN: With respect to the potential future
20 claim of Logistics Plus against Central Transport, if such a
21 claim existed, there are defenses to that claim, which would be
22 litigated.

23 THE COURT: I have no doubt. All right, that's what
24 we're going to do, we'll clean this up. Yes, sir.

25 MR. COHEN: I think there was one technical item,

1 and maybe I'm confused. In number three if they find if the
2 cargo was inadequately packaged and the lack of proper
3 packaging is a substantial factor in causing damage to the
4 cargo -- don't proceed to the next question, I think it's done.

5 THE COURT: That's correct, you're right. All
6 right, we have a little more tinkering. How long is your
7 closing?

8 MR. DELANEY: Twenty-five, 30 minutes maybe.

9 THE COURT: How about you, Mr. Cohen?

10 MR. COHEN: Similar amount, your Honor.

11 MR. KNOX: I would think it's 15, 20 minutes. Could
12 I ask for about five minutes, in light of some of the rulings
13 here, to tinker with my closing.

14 THE COURT: All right. We're going to take a short
15 recess.

16 (Recess from 1:45 p.m.; until 1:50 p.m.)

17 MR. KNOX: I think you made some comment from the
18 bench that if you recover against one defendant, you recover
19 against all, something to that effect?

20 THE COURT: The way the case is presently postured,

21 would it be possible for the jury, for instance, to bring in a
22 verdict against you without bringing a verdict against you,
23 that is Central for the record. I would say no. And,
24 conversely, I don't see how they can bring a verdict against
25 Central without bringing a verdict against you under the

138

1 statute.

2 MR. KNOX: I thought you said -- if you think about
3 it this way, if you make out a prima facie case, the burden
4 shifts to us, Mr. Cohen and I have to meet our defense, can I
5 make that defense. We're going to argue that. Can Central
6 Transport, they may not. I think we have a better chance
7 because I think we can prove that we aren't negligent, if they
8 buy the package theory, I don't think they can.

9 THE COURT: That's not the whole story. The rest of
10 the story, by all lights each of you would have to prove,
11 essentially, under the Act is the equivalent of intervening
12 acts or superseding cause. Which in this case would be that --
13 was that the shipper was responsible for the damage because of
14 bad packaging. In other words, it's not enough for a jury to

15 let you off the hook because you're simply not negligent. They
16 also have to find that the packaging wasn't any good.

17 MR. KNOX: If they agree that packaging is properly
18 proved as a defense, then they also have to prove that there is
19 no negligence. I think we can prove that. I don't think they
20 can. Again, it's a two-prong defense. Again, that assumes
21 that the jury would have to buy the packaging defense. If they
22 don't buy the packaging defense, I would agree with you. If
23 they don't think it is potentially very likely.

24 THE COURT: I see what you're saying. What do you
25 have to say about that?

139

1 MR. COHEN: Based on the court's rulings, the
2 packaging defense is equal.

3 THE COURT: Everyone shares in that?

4 MR. COHEN: It's packaging. He's going to argue
5 package defense. I'm going to argue packaging defense.

6 THE COURT: Here's the problem, John. A packaging
7 defense, if successful, is exonerative of both of you, you
8 never reach the question of negligence.

9 MR. KNOX: You're right.

10 THE COURT: All right.

11 (Recess from 1:58 p.m.; until 2:30 p.m.)

12 THE COURT: Sorry for the delay, sometimes things
13 take longer than anticipated.

14 THE COURT: We're going to play it by ear. You're
15 certainly going to hear all of the closing arguments today.

16 The guesstimates is all combined that should take something
17 around an hour and a half. So with a short break, I may or may

18 not give you my charge this afternoon. In all likelihood
19 you're going to get it early tomorrow morning, we'll see.

20 All right, Mr. Cohen, are you ready to go?

21 MR. COHEN: Yes, your Honor.

22 MR. DELANEY: I think Logistics goes first if we
23 reverse it --

24 THE COURT: That's quite all right. This is one of
25 those situations insofar as I'm concerned, it does not make any

140

1 difference. I would defer to defense counsel as to who wants

2 to go first. I'll break the tie.

3 MR. COHEN: I'll go first, your Honor.

4 THE COURT: For all counsels' information and
5 edification, that 30 minutes is really the top end, so keep
6 that in mind as you're working through your closing.

7 MR. COHEN: Thank you, your Honor. Good afternoon.
8 You made it, you made it through all that testimony,
9 congratulations. Thank you very much for your patience and
10 your time, and my client, Central Transport, appreciates you
11 serving today. It's an honor and it's a big responsibility.

12 And this case is a claim about freight damage and
13 the parties really take this seriously. That's why it's come
14 to a trial in federal court. So thank you very much for that
15 to begin with.

16 In this case you heard a lot of testimony about a
17 lot of different things. You heard testimony about paperwork,
18 you heard testimony about packaging. You heard testimony from
19 different people from the various companies. What I'd like to
20 focus on in this closing is the particular steps you're going
21 to have to go through in coming to your decision when you go
22 back to the jury room. And we're going to go over all the
23 evidence briefly with respect to those choices.

24 You're going to have to determine, the first thing

25 you're going to go back there and have to decide is whether or

141

1 not the freight was delivered to Central Transport's driver in

2 California in good condition. That is the first element, was

3 it delivered to that guy, that truck driver in good condition.

4 The next step you're going to have to decide is when

5 it got to the warehouse or to Accu-Spec in Erie, was it in bad

6 condition.

7 Now, the third thing you would get to is damages, if

8 there were any, we'll get to those.

9 Let's talk about the second element first. Did the

10 freight come to Erie and arrive in bad condition. I don't

11 think there's any doubt. You've saw those pictures 20,000

12 times, the thing was damaged, okay, clearly it was bent. No

13 question about it. So that one is done, okay.

14 But you got to go back to the first one. The first

15 one, was it given to the truck driver in California in good

16 condition. This is a burden that rests with the plaintiff to

17 establish before you can go forward, you can move on. It's

18 Central Transport's position, we ask you to find that there's
19 not enough evidence to establish that it was given to the truck
20 driver in California in good condition. The reason Central
21 Transport is asking you to come to that conclusion is based on
22 the evidence that came through the witness stand and through
23 the documents.

24 There is testimony from the Dage employee, his name
25 is Joe Fisher, who was on the video screens. He testified that

142

1 he was not there the day of the shipment. He testified, also,
2 that he was not the guy who put the machine into the crate. So
3 doing a time line, you want to fill every spot before you get
4 it into the truck.

5 In this case the plaintiff had the burden to do that
6 with enough evidence to make it clear that it was in good
7 condition. We don't know some things. We don't know if the
8 freight was packaged into the crate in good condition. We
9 don't know if it was damaged before it actually got in the box.
10 We have not heard testimony from that person, I think his name
11 is Tran, he may have been the person who packaged it. We have

12 no information with respect to the actual, once it was in the

13 box, what happened in moving it into the tractor-trailer.

14 We do have, let's be very clear about the evidence,

15 both sides, there is evidence on both sides, you have to weigh

16 it, it's your job. There is a piece of paper, that bill of

17 lading, and the driver, Grminder -- I forgot his name, the

18 driver signs it. Okay. We had testimony from various people

19 about what the driver's job is, what the driver's job isn't.

20 The driver can't be everything to everyone. They have certain

21 responsibilities. They drive the truck. They have DOT

22 certification. They look and see is it a crate. If it's a

23 crate, that's what I'm here to pick up, crate, in the truck.

24 This crate on the outside of it did it have some

25 visible damage. However, the damage on the outside of the

143

1 crate wasn't all that great. Is it possible that this truck

2 driver saw the damage and he didn't report it. We don't know.

3 We really don't know because we don't have testimony from the

4 people in that section of the chain.

5 We have the guy who inspected it a few days before,

6 though, he wasn't there the day it was packed, he wasn't there

7 the day it was put into the truck. So because we're missing

8 those links and the only evidence to suggest otherwise, is the

9 signature of the driver on the bill of lading. And the fact

10 that no reports of damages were created. We're asking you to

11 find that that is not enough. You got to fill the links, you

12 got to link the chain together to get into the truck. That's

13 the first point.

14 Now, we checked the signature on the bill of lading.

15 We have signatures in this case on another piece of paper, it's

16 that delivery receipt, let me put it up. This is the delivery

17 receipt. The delivery receipt has a signature on there as

18 well -- by Mr. Mullen. So, plaintiffs can argue that the

19 signature of Grminder Shing means that was in good condition.

20 But the signature of Mr. Mullen doesn't mean that it was in

21 good condition. You know, listen, these signatures are what

22 they are, they only have so much weight. As you can see,

23 there's been testimony that that signature -- oh, I made a

24 mistake, it was damaged. Mr. Mullen, he was straight up.

25 THE COURT: Mr. Cohen, I'm sorry to interrupt you,

1 you're going to have to slow down for the court reporter.

2 MR. COHEN: Thank you, your Honor. My point is with
3 respect to the signatures on the papers, they only go so far,
4 it's for you to weigh that. That's just one part of Central
5 Transport's defense in this case. So we talk about step A, did
6 it go into the truck good; step B, did it come out of the truck
7 damaged. We say step A is not fulfilled. Step B, yeah, it
8 came out of the truck damaged.

9 The next thing you have to decide in your chain of
10 decisions back there is what was the cause really of the damage
11 to the X-ray machine. There's been a lot of testimony on this.
12 A lot of people came up here and testified about that. There's
13 two things that could have caused damage to the X-ray machine.
14 Improper packaging or improper handling, one or the other.
15 Improper packaging, improper handling.

16 Here we believe that the testimony is overwhelming
17 with respect to its substance that there was improper packaging
18 of the machine for transportation across the United States of
19 America. Okay. So you're going to be asked if the cargo was
20 improperly or inadequately packaged.

21 I'm going to briefly go over the evidence as to why

22 Central Transport is asking you to find that the packaging was
23 improper and insufficient for transportation of this
24 sophisticated machine. Now, what I'm going to show you first
25 is just a description, brief little description of some of the

145

1 things that were involved in this machine. I'm not going to
2 get into much detail, quite honestly, because I don't really
3 understand what some of the words mean, I just don't know what
4 a job report is. But it's complicated, we know it's
5 sophisticated stuff. You saw pictures of it and you could tell
6 that this thing isn't like a box of rocks, this is very
7 complicated stuff. This has computer screens, it has lead
8 lining, it has all kinds of expensive and I'll say somewhat
9 delicate components.

10 If you're your going to ship a machine like that,
11 you're going to have to really, really make sure it's packed
12 right. It's over two tons, like heavier than a car. So it
13 needs to be secured in a tight space. During the opening
14 statement for Accu-Spec, there was testimony that it was snug.
15 The evidence, however, presented by the witnesses and the

16 documentary evidence and photographs establish that it was not
17 so snug.

18 I'm going to show you briefly just a couple of these
19 pictures. This is one of the pictures of the machine that were
20 presented. You heard testimony from a variety of people.

21 With respect to the packaging, you heard from Mr.
22 Carlson. He is the president of Accu-Spec. Remember him, he
23 was a long time ago, he was the first witness. He testified
24 that he thought the machine, by looking at the crate, the
25 damage, he thought the machine might have been dropped.

146

1 However, he was quite candid, he admitted I'm the president of
2 Accu-Spec, I don't really do much shipping or looking at
3 crating, it's not his job, he's running a company, he admitted
4 it. He told this jury, he told you that I don't see much of
5 this stuff. So you, as the jurors, have to weigh the evidence,
6 what knowledge base does he have, how much weight should I give
7 to it.

8 The next testimony came from Mr. Mullen. Mr. Mullen
9 is the person who arranged for the transportation, an Accu-Spec

10 employee. He testified that he believed that it wasn't -- it
11 wasn't the packaging. He again on cross-examination said, you
12 know, I don't really do this, I don't have very much experience
13 with this, I'm not a trucking transportation guy, I'm a project
14 manager at this electronics company. There, thank you, Mr.
15 Mullen. He's given us the information, you have to balance
16 that.

17 After that, the Dage employee testified from the
18 video. His name was Fisher. And he testified that usually
19 when these things are packed, they're packed in sufficient
20 packaging to move them around. And that he thought that it
21 would be good enough. The thing with Mr. Fisher's testimony is
22 that you have to think about, you will be instructed about
23 this, is, think, Mr. Fisher works for Dage. They're the ones
24 who packed it. They have an agenda, a bias. Everyone has a
25 bias in life and in this case. But you got to think, well, Joe

147

1 Fisher is the guy who is in charge of packing these things, is
2 he going to get up and say no, it was not that good.
3 Obviously, he's not going to say that. So you got to

4 understand from where he was coming. Also, his level of
5 intimacy with the facts. He only saw some pictures, he wasn't
6 there at the scene looking at this thing.

7 Then you heard from Mr. Horetsky. Mr. Horetsky is,
8 of the people who testified, he is the one who had absolutely
9 the most experience, up to this point, he had the most
10 experience looking at freight. That's what he does, for years
11 and years he's been involved in the business, he's a sales guy
12 in the trucking industry. So, you hang around crates, you see
13 damage sometimes. He testified based on his substantial
14 experience that there wasn't any internal bracing that that
15 would be sufficient to keep this from moving around.

16 Now, what I wanted to point out about this machine
17 and which is interesting, this machine was on casters. If you
18 look on the bottom there, you see the casters. All right. You
19 could roll this two-ton guy around, I guess, if you push it
20 pretty hard, it's got wheels. So the machine has casters.
21 However, there was no testimony that the casters were removed
22 when it was packaged to move on the Central Transport truck.

23 However, interestingly enough, in evidence that was
24 presented about when they moved it when it was going to get

25 fixed, the company that moved it that time and packed it that

148

1 time, was smart enough to actually take the casters off. So
2 this is an invoice from carting and storage, Erie, PA. They're
3 the ones who packed it when it was going to go get fixed. And
4 they indicate in their explanation that they did a few things.
5 They removed the casters from the bottom of the machine,
6 probably a good idea. They wrapped it with foam padding and
7 packed it into the box. They set the machine on a hardwood
8 skid, they actually secured it to the skid, and they blocked
9 it. Now, that's how you're supposed to pack it. That's good.

10 What happened in the situation where the machine
11 went from the Fremont showroom facility for Dage to Erie, is
12 the casters were left on, the foam padding was left out, and it
13 wasn't secured to the skid, and it wasn't blocked properly. So
14 everything that these guys did right, they did wrong when they
15 brought it out from Dage.

16 Now, how do we know, what about those casters. As
17 far as evidence with respect to casters, you have to put it
18 together. But one of the people who testified was the truck

19 driver, Dale Meabon. He's the delivery truck driver, he came
20 in with jeans on. He testified that he was there, he stuck
21 around. He stuck around, he's curious, he stuck around to
22 watch, let's see what they're doing, they open the box. He
23 said it had rolled, he used the word rolled. He said it rolled
24 to one side. Maybe it's because they didn't take the casters
25 off, that might have been a good idea. That's a possibility,

149

1 that goes to packing.

2 With regards to packing as well, you know who's not
3 here today, Dage. Dage packed it. Central Transport didn't
4 pack it. Logistics Plus didn't pack it. Dage packed it.
5 They're not here. They're the ones who were responsible for
6 packaging. So if fingers are pointing, it's a shame that
7 fingers are pointing but they have to have the truth come out
8 and fairness come out really. The finger would be pointing at
9 the packer, Dage.

10 Mr. Cackowski also testified, just to sum up some of
11 the people with regards to this issue. Mr. Cackowski, sitting
12 over there, he testified about he was the claims manager for

13 Central Transport, he's been there, sounded like forever. He
14 had been there 20 years, he's had all kinds of jobs.
15 Everything from rating, to beginning claims, all kinds of
16 claims. Now he's the claims manager. He sees claims like this
17 all the time. He has more experience seems like than Mr.
18 Horetsky, Mr. Mullen, Mr. Carlson and everybody combined. He
19 testified that has seen damage to crates, he has seen hundreds
20 of claims. He has seen the damage to crates, and he testified
21 that the problem here was that that piece of machinery was not
22 actually snug in the box. It had space on either side. It's a
23 packaging principle that he testified to, as did Mr. Berlin.
24 That it's a packaging principle that you fill voids. It's
25 common sense, I mean it's not rocket science, packaging

150

1 science, you fill voids. You got to fill them because
2 otherwise freight tends to move around in there. It's not like
3 it's being carried, you know, it's not like it's being carried
4 by -- something slid along. This thing is on a truck, it's in
5 the back of a tractor-trailer. If you've ever seen one go down
6 the highway, rumbling along, that's what they do, they're

7 tractor-trailers. They're not airships. So they make some

8 normal movement. If you're going to pack a piece of freight,

9 you're going to have to fill the voids.

10 You can fill the voids by doing a couple things.

11 There was testimony from Mr. Cackowski that he should have

12 braced, internal bracing. In packaging there's external box

13 and internal bracing. There should have been either boards

14 bracing the machine or better yet, he said -- why don't you

15 remove this shelf. The shelf should have been removed, and

16 then you could have had it flat up against there. And this

17 thing wouldn't have rolled over or it had nowhere to roll. If

18 you built the wall here, you wouldn't have had that problem.

19 In fact, this machine, Mr. Carlson, who purchased the machine,

20 testified it was about six by six by six, that was an

21 approximation. I mean I'm not going to hold him to that, he

22 didn't measure. That box was listed about seven-foot five, by

23 5'9", by 72. It's a couple feet on each side of this thing.

24 Either you got to fill it or you got to make the box smaller.

25 You either got to fill it, brace it or make the box smaller,

1 really that's what it is. Sorry I'm speaking so quickly. But

2 these things were not done.

3 Now, all of these witnesses testified. Mr.

4 Horetsky, Mr. Cackowski and Mr. Meabon, they all worked for

5 Central Transport. You're making a decision as to the total

6 picture of how this happened. You can consider all that with

7 respect to, but I think that -- well, it would be for you to

8 determine, quite honestly, it doesn't matter. It will be for

9 you to determine the credibility of Mr. Meabon, the truck

10 driver. It will be for you to determine the credibility and

11 weight to give the evidence from Mr. Cackowski, the freight

12 claims manager. It will also be for you to determine and give

13 weight to the evidence from Mr. Horetsky, what he thought. You

14 can think a lot of it, you can think a little of it, it's your

15 decision. We think that this evidence is overwhelming.

16 And the other piece of evidence that came in was Mr.

17 Berlin. Mr. Berlin of Logistics Plus testified that he has an

18 awful lot of experience packing, too. And he said that he

19 knows that there's a way to actually inject foam that hardens.

20 You can imagine the insulation you put in your walls, you can

21 spray it, it gets hard. That's the kind of thing that they can

22 put, that would have been great, that would have kept it from

23 shifting around. He testified that that actually would have
24 prevented the damage.

25 So the last testimony, if you will, that we got with

152

1 respect to packing was from the tip and tell. The old tip and
2 tell. This was more of a handling than a packing issue. Let
3 me show you what I mean. This box had a device on it, a tip
4 and tell. The tip and tell, I am confident that I can tell you
5 the tip and tell has no bias. The tip and tell must tell the
6 truth. The tip and tell was put on at Dage. The tip and tell
7 did not reflect any tipping, it was not activated.

8 So if you want to discount everybody else's
9 testimony and listen to the tip and tell, that is a piece of
10 evidenced for you to consider with no bias. It's a piece of
11 machinery.

12 So with respect to this freight handling, when you
13 look at the total evidence, we believe that you will come to
14 the conclusion that it was the packaging. Again, two things
15 can cause damage to freight on a truck. It can be packaged
16 badly or -- I'm going to use the word that I think will be

17 presented to you, or it could be handled improperly. There is,
18 we talked about packing now, I'm sure you're done with it,
19 we're done with it.

20 But with respect to handling, there is no record
21 anywhere of improper handling. Mr. Cackowski testified that
22 it's the procedure of the company for reports to be made of
23 improper handling. He's the claims manager, they build a file,
24 open a file, evaluates things. He evaluates the bill of
25 lading, delivery receipt, any information about improper

153

1 handling. Inspection report, there was no information about
2 improper handling because there was none. If there was, there
3 would have been a piece of paper associated with that.

4 So when you couple that with the visualization
5 really of what happens in the back of a truck normally or in
6 the back of a bus, whatever things rumble down on the highway
7 from California, you're going to understand there is a certain
8 amount of movement that the thing is going to have to
9 withstand. Because it has to be transported in a truck. In
10 this case it also has to withstand being picked up by a

11 forklift and put down by a forklift, maybe a couple times.

12 So we believe that there is no testimony which
13 weighs in favor of concluding that the freight was mishandled.
14 In other words, we think the balance of information is much
15 more in favor of the packaging that caused the problem, rather
16 than handling. There is no question that a couple people out
17 here think that it was dropped. These are people that have
18 very little information on packaging. So that is how it comes
19 down to on the packaging defense for Central Transport.

20 Now, the other thing that I wanted to draw your
21 attention to is the issue of -- well, if you find that the
22 packaging was improper and caused the damage, then, really it's
23 not Central Transport or Logistics Plus that should be found to
24 pay for it, really the finger or the responsibility would rest
25 with Dage. And Dage isn't here. Dage is not here. So that's

154

1 what we have for packaging.

2 The other issue is with respect to damages. If you
3 decide that the freight went into the truck and in good
4 condition, came out in bad condition, and that the packaging

5 was not a contributing factor in creating the damage, you're
6 going to have to determine, well, what are the damages. This
7 lawsuit is about money, so what are the damages. You're going
8 to have to find that those damages are reasonable.

9 Now, this is a machine, nobody knew it was an X-ray
10 machine. But now we know it's an X-ray machine that they flew
11 to England. But before they flew it to England, they had an
12 English scientist or engineer fly over here, his name is Peter
13 Dunn. There was testimony and evidence in the form of an
14 e-mail that Mr. Dunn wrote, he got the pictures. They were
15 e-mailed to him. He wrote this thing looks totaled. You got
16 to send it back to England, I'm going to cancel my flight, I
17 should show you that. What happened is he said, you know, he
18 was the one who testified about the leaky radiation, don't turn
19 it on. He said right here, I will cancel my trip, I've already
20 inquired about getting a new system. What happened instead is
21 they flew him out and it cost about \$2,100 to do that.
22 Ultimately, they sent the machine back to England anyway. If
23 you get to damages, which we would ask that you don't because
24 of the evidence, we'd ask that that expense be eliminated
25 because he could have inspected it in the UK, just as well as

1 he could have inspected it in the U.S. Here he had the opinion
2 that it was totaled, he didn't need to fly out here and spend
3 \$2,000 to do it.

4 Well, that's pretty much Central Transport's defense
5 in this case and position. We ask that you find in favor of
6 Central Transport based on your evaluation of the facts and the
7 evidence and the documents presented. Thank you again for your
8 time, you've been very patient with this case. Okay, thank
9 you.

10 THE COURT: Mr. Knox.

11 MR. KNOX: Thank you, judge. Good afternoon.
12 Ladies and gentlemen, I want to echo Mr. Cohen's sentiments and
13 thank you for your dedicated service and patience here. My
14 parents told me to always say that and I always do say that in
15 trials, I do sincerely mean that. But in this case I really
16 mean it. I wish we could have offered you a much more exciting
17 case to digest here. The fact that you had to sit back and
18 listen to three companies argue about damaged freight I think
19 makes your service even more compelling. I do truly want to

20 thank you.

21 You've heard a lot of information, you've heard a
22 lot of testimony. You've seen a lot of evidence here today.
23 A lot of it is probably too excessive. A lot of it is too
24 confusing. If we've done our job, we've given you enough
25 information. But our job really at this point is to distill

156

1 that information, boil it down to really the bare facts that
2 you need to decide this case.

3 If you can focus on some key issues here. I think
4 your decision will be relatively easy, notwithstanding the fact
5 that you heard so much about wine glasses, classes, all sorts
6 of stuff that maybe you've never heard about. In a moment the
7 judge will in fact instruct you on the law here.

8 Again, we are in federal court. How did we get in
9 federal court to have this trial. The reason we are here in
10 federal court is that we have a federal law that applies here.
11 It's very unique. Very different, this isn't a run of the mill
12 somebody runs a stop sign automobile accident case. We have a
13 law and the law tells you what to do here.

14 And what the judge will instruct you is that in
15 order for Accu-Spec, the shipper, the plaintiffs suing here, in
16 order for them to recover, Mr. Cohen is exactly right, they
17 have to prove three things. Number one, that the crate was
18 delivered to Central Transport in California undamaged. Number
19 two, that the crate arrived in McKean at Accu-Spec's facility
20 damaged. And then they have to prove their damages.

21 Now, I'll leave that up to Accu-Spec to argue
22 whether they've proven that case. That's the first step under
23 the law.

24 The second step is that the defendants, including
25 Logistics Plus, my client, then they get to defend that suit.

157

1 We get to do so through evidence and testimony. And the
2 standard in proving that defense is through a preponderance of
3 the evidence. Again, the judge will instruct you on what that
4 means. Maybe you've heard that term before. What that really
5 means very simply is a little bit more evidence saying yes than
6 no. He'll talk to you about the scales of justice. It's a
7 pretty apt analogy as to how to look at evidence. If you think

8 it's a little bit more evidence than not, then neither side has

9 proven the defense.

10 Now, in order for us to prove our defense, there are
11 two things. Logistics Plus has to prove, number one, that it
12 was not negligent. Number two, it has to prove that through
13 the act of the shipper something caused this damage. A
14 substantial role, played a substantial role in causing these
15 damages.

16 Central Transport I think has done a very good job,
17 I don't want to belabor the point over the packaging defense.
18 But we share that defense. We agree through the testimony of
19 Mr. Berlin, Mr. Cackowski and other people, really the people
20 who have the most experience here, that in fact the packaging
21 defense is not some technical defense to get us off here. This
22 is a real defense.

23 First I want to talk about the first element, that's
24 proving negligence, or the lack of negligence on our part.
25 Again, we have to prove that. Accu-Spec doesn't have to prove

1 negligence on our part. We have to prove that we were not

2 negligent, just so we're clear.

3 Let's talk about that first. Do you think by a
4 preponderance of the evidence that Logistics Plus was
5 negligent. Ladies and gentlemen, I don't think I have to argue
6 that point very strongly. Which it's a nice position to be in
7 a case like that. Because I think the witnesses, all of the
8 witnesses here really have done that for me.

9 The main allegation, as I alluded to in the opening,
10 is that essentially we have somehow misclassified the freight.
11 Misclassified it, this X-ray machine, it should have been a
12 Class 100, meaning freight that is more fragile, more
13 susceptible to breaking and that it should have been handled at
14 a higher degree of care. That essentially is the main
15 allegation of negligence on our part.

16 Well, let's break that allegation down. We should
17 have identified the X-ray machine as Class 100. Ladies and
18 gentlemen, you heard a lot of testimony in this case, but have
19 you heard any testimony that says that we were told that this
20 was an X-ray machine. Have you heard any testimony, have you
21 seen any evidence that we were told that this was a \$120,000
22 X-ray machine or that it was fragile. Clearly, the answer is
23 no.

24 The only thing we have is this e-mail from Jim

25 Mullen. I'll put that document up. That's really the only

159

1 evidence that they have saying that they told us anything about

2 this shipment, other than it was a crate. It's a key document.

3 You have to think about really what is being ordered here, what

4 is being shipped. This is not a set of steak knives, this is

5 not a crate of tennis balls, this is something extremely

6 valuable, a \$120,000 X-ray machine. And there is no written

7 documentation saying that. There's no conversation confirmed

8 by anybody. In fact, the key witness, Mr. Mullen, in front of

9 everyone in open court admitted that he didn't tell anybody it

10 was an X-ray machine. He admitted that he didn't tell anybody

11 that it was worth \$120,000. And if you plug that testimony

12 into the allegation that we were somehow negligent because we

13 misclassified the freight, you need to think about that. If he

14 doesn't tell us that it's an X-ray machine, how should we have

15 classified it as an X-ray machine, let alone a valuable X-ray

16 machine. Does that make any sense. It really doesn't. And I

17 think it's a little sad that we even have to address that

18 issue, quite frankly.

19 This is clearly a situation where you don't need to
20 be an expert in the shipping industry. I don't know about you,
21 but I have never purchased anything, other than my home, that
22 is worth \$120,000. But I do know that if I ever do purchase
23 something for \$120,000 on e-Bay or anywhere and I got to order
24 it, I'm going to tell whoever I'm ordering it from what that is
25 for sure. I'm sure you would do the same. You don't need an

160

1 expert to know that. You can come here with your common sense
2 experience and you'll reach that same conclusion, I feel pretty
3 confident about that.

4 Now, let's break down the second part of that
5 allegation. Class 100 cargo being cargo which was fragile and
6 needed to be transported with a higher degree of care. Again,
7 have you heard any testimony or seen any evidence that
8 basically says that. No. In fact, all of Central Transport's
9 witnesses, including their truck driver agreed, that class
10 really isn't an issue here in terms of how somebody handles the
11 freight. It doesn't really correspond to somebody picking it

12 up on the dock and treating it like with kid gloves, it just
13 doesn't. And if that's the case, I think you dissect the main
14 allegation of negligence, clearly we're not negligent. Clearly
15 we're not negligent. Now, strangely enough this allegation
16 about class having some corresponding relationship for fragile
17 or how you're supposed to handle it, put that all to the side,
18 and you might be wondering why I was constantly putting up the
19 that silly picture about the crate with the wine glass. But
20 you remember that wine glass communicates to the person on the
21 dock, the truck driver, that this is in fact fragile. You
22 should handle this with care. They don't know anything about
23 class. You heard Mr. Meabon, the truck driver, say that. They
24 know what a wine symbol is, everybody in this courtroom knows
25 what a wine symbol is. So I think that is quite an interesting

161

1 point as well.

2 In any event, just as I predicted in the opening
3 statement to you, as I just argued, I don't think there's any
4 evidence here at all that shows we were negligent with respect
5 to that main allegation.

6 Now, there are some other allegations out there
7 about wrongdoing generally floating in this case. Number one,
8 that this item was perhaps poorly packed. Okay. That very
9 well may be. I think Mr. Cohen has touched on that, I'm going
10 to touch on it a little bit further. But in many ways that
11 does not involve Logistics Plus if that is the allegation of
12 negligence. We don't pack this. Again, we're here in Erie,
13 Pennsylvania quoting prices, directing carriers to do things
14 and that's about it. We're not there, we are not packing. So
15 if packing is some allegation of negligence, we're not involved
16 with that.

17 The other general allegation of wrongdoing here is
18 mishandling of the freight. And, again, similarly, we're not
19 handling this freight. Can we be negligent on that. I don't
20 think so. So those are really the allegations of negligence
21 here.

22 The Class 100 issue, we should have classified
23 something that nobody ever told us about, really that doesn't
24 make sense. The packing, clearly we don't do the packing. The
25 handling, we don't do that. So, in sum, on this first point of

1 our defense, I think we easily meet that. There is no evidence
2 of negligence on our part.

3 Now, the second part of that defense, as I
4 indicated, is the defense that the action of the shipper, in
5 this case Dage, or Accu-Spec, they are somewhat
6 interchangeable, which is a little confusing, that they
7 improperly packed this piece of equipment.

8 I think Accu-Spec probably has a lot of sympathy in
9 this case, if I were sitting in their shoes. After all, here's
10 a growing company, here in our neck of the woods, that orders
11 this big machine, it's very valuable, it's very important to
12 them, and it shows up and it's smashed. I would be very upset
13 if I was Mr. Carlson. I don't envy you. But, again, we are in
14 federal court here and we have this very unique law that
15 applies. And really, as Mr. Cohen so thoroughly touched on,
16 this crate clearly was not packed right. And that is not just
17 some technical defense here to get us off. I think a good
18 question to ask you folks is how many here, I'm not asking you
19 to raise your hand, I'm asking you the question, think of the
20 answer in your head. How many of you have bought a television

21 set recently. And think about how a television set is packed

22 in that box. Just a stupid TV, maybe \$250 TV. You're going to

23 get at Best Buy, at Circuit City. You'll open that box, what

24 does it have already around it, it drives my wife crazy, she

25 says it's hell on earth with it being a styrofoam suit in a

163

1 styrofoam room. All that squeaky styrofoam, just around a \$250

2 TV. That clearly makes sense. Why because that TV maybe even

3 coming from Japan, maybe from California.

4 In this case we have a \$120,000 X-ray machine with

5 metal on wood, with no buffer, nothing like that in a TV crate.

6 We just have some cellophane wrapped around this thing. You've

7 heard the witnesses in this case testify about the foam

8 packaging. Mr. Berlin, who heads our client's company,

9 Logistics Plus, he's a great guy. He's an interesting guy with

10 a varied, varied background. And I think you might have got

11 that from his testimony. He's driven a forklift, he's driven a

12 truck. He's run a company, he's employed people, he's been in

13 the shipping industry, he lives and breathes it. He has a

14 background, he has credibility, he has authority. What did he

15 say about this issue. He said really it's a pretty simple
16 thing, all you have to do is get a foam packing device, fill it
17 up and it's pretty snug. You're probably going to get some
18 bumps along the way, as Mr. Cackowski indicated, and that's
19 natural to understand, you're driving across country. I think
20 Mr. Cackowski said this isn't a situation where you're going
21 from Erie to Altoona. You're going cross country, perhaps at
22 three in the morning sometimes, who knows. Who knows what
23 pot-holed filled roads are out there. And you have metal on
24 wood with nothing protecting it. Interestingly, also, you have
25 a machine with casters. Attorney Cohen showed you a document,

164

1 how another company took the casters off. What are casters.
2 Casters are wheels. Why wouldn't you take wheels off of a
3 shipment that valuable and important that is going across the
4 country. Doesn't make any sense.

5 Again, I think the funny thing about this case is
6 that throughout all this information here, you can really apply
7 your varied real world common sense. I've never packed an
8 X-ray machine. I don't know if you have either, I suspect you

9 haven't. But I think anybody looking at this would say that

10 doesn't look too good. That looks like the U-haul that I

11 packed when I came back to Erie from law school, I jammed

12 everything in there. Hard stuff on hard stuff. There is no

13 insulation, there is no bracing, I think it's irresponsible.

14 One of the other interesting facts that I think you

15 need to remember. A little fact that Mr. Fisher mentioned.

16 This was a used crate. This crate originally came from

17 England, it was used. They used it at the demo shows, it is a

18 relatively new machine. No doubt about that. But the crate,

19 that has been used. Whenever I mail something in an envelope,

20 I don't reuse that envelope as much as I might want to save

21 some money. But they have reused the crate and they didn't

22 pack it properly. I think you need to factor that into your

23 analysis.

24 But I think on this point the main issue, like Mr.

25 Cohen touched on, is the credibility of the witnesses. The

1 only witness really in this case who has spoken to the fact

2 that this was packed correctly is the guy who packed it. The

3 guy who has not been sued, the guy who is not here. Again, I
4 bring that up because your tendency may want to be you want to
5 award Accu-Spec damages here because after all they just
6 ordered this thing, they didn't do anything wrong, right.
7 Again, we'll argue that maybe they did, but it doesn't matter
8 in this case. But the fact of the matter is that packing
9 really played a role. They don't like to hear that because
10 Dage wasn't sued, but that's the case.

11 Ladies and gentlemen, those are just some of the
12 points I wanted to touch on. I hope we haven't given you too
13 much information, I hoped this exercise in closing argument has
14 kind of helped you to finally see some of the information so
15 you can decide this case. It's a little bit of a different
16 case, but I really think that if you listened to what we said
17 here, that you will find for the defendants here that we met
18 our defense. I'm want to thank you for your time, it has been
19 a pleasure to appear in front of you. Thank you.

20 THE COURT: We're going to take five minutes, then
21 we're going to hear from Mr. Delaney.

22 (Recess from 3:20 p.m.; until 3:42 p.m.)

23 THE COURT: All right, Mr. Delaney.

24 MR. DELANEY: Thank you, your Honor. Hello, folks.

25 This is the time we get to talk about what conclusions to reach

166

1 based upon the information that we've heard. And I do want to
2 go down through things sequentially. But I want to start by
3 correcting a mistake, what I believe is a mistake. Mr. Cohen
4 was talking about the reasonableness of the claim we were
5 making. Talking about the damages that we had incurred,
6 expenses we've incurred, and he suggested it was inappropriate
7 for us to have an engineer come to Erie to inspect this piece
8 of machinery. He showed you this e-mail and suggested that it
9 demonstrates, this is Plaintiff's Exhibit 24, and he suggested
10 that it demonstrates in this paragraph that the engineer had
11 already said I'm canceling the trip, I don't need to come, but
12 we had him come anyway. That's not the engineer who is writing
13 that e-mail. That's the gentleman from California, Peter Dunn
14 was the engineer who was coming from England. This gentleman
15 simply is telling us that he's been made aware of the damage
16 that has occurred and whatever trip he had, whatever trip he
17 had planned, he was cancelling to try to arrange for a new
18 machine. I just wanted to clear that up right at the outset.

19 It isn't at very complicated set of facts that we
20 have. We know that there was a shipment that left California
21 on February 5th of 2003, arrived in Erie on February 14th of
22 2003. We know that when the shipment arrived in Erie, that the
23 package, the cargo was damaged. And they've now admitted that.
24 You've heard both Mr. Cohen and I believe Mr. Knox acknowledge
25 that that aspect of the case isn't important to you anymore.

167

1 You also heard a great deal of testimony in this
2 case about new or used. He heard Mr. Berlin say that whole
3 issue came up just a couple weeks ago. That issue is out. You
4 don't even have to think about that issue.

5 What do you have to think about. Well, as I said in
6 the opening statement, we're here in federal court because
7 there's a federal law that determines the relationship between
8 shippers, that's us; freight forwarders, that's Logistics Plus;
9 and motor carriers, that's Central Transport. It's called the
10 Carmack Amendment. And it essentially says that when a shipper
11 turns over goods to a motor carrier in good condition, and
12 those goods then are taken to their designation and at the

13 destination they're found to be damaged, the shipper collects.

14 The shipper gets to collect from the freight forwarder, who may

15 have never touched the goods, and from the motor carrier. Not

16 doubled the amount. But it provides a shipper, like Accu-Spec,

17 with the opportunity to go to two different sources for

18 collection. That's the Carmack Amendment.

19 Now, there's a defense. If we establish for you

20 that the goods were turned over in good condition and then

21 arrived in damaged condition, and we had money damages, we

22 collect. But there's a defense. There's a way for the motor

23 carrier, the freight forwarder, to avoid liability. And that's

24 to show that we, the shipper, caused the damage.

25 Now, let's think about the proof. Let's think about

168

1 what we have. I guess before I talk about the details, I'm

2 going to touch on something you'll hear about from the judge.

3 And that's different kinds of evidence. There are really two

4 kinds of evidence, direct evidence and circumstantial evidence.

5 Direct evidence is something you see for yourself. You make an

6 observation, you can testify to that observation. The people

7 who saw the crate, for example, when it arrived at Accu-Spec,
8 saw its condition. Their testimony is direct evidence about
9 the condition of that crate. Circumstantial evidence is
10 evidence that could allow you to reach conclusions based on the
11 circumstances. The judge will tell you that circumstantial
12 evidence is as weighty, as important, as valid as direct
13 evidence. It's up to you to make the decision about what
14 inferences can be drawn. So we have circumstantial and direct
15 evidence.

16 Now, let's think about the proof of the elements
17 that need to be established in order for us to recover. The
18 first thing we have to do is establish that the goods were
19 turned over to Central Transport in California in good
20 condition. What do we have.

21 Well, the first thing we have is Mr. Fisher. Mr.
22 Fisher is the gentleman we saw on the video screens. He told
23 us that he wasn't there that day, but he assigned a technician.
24 He's the guy in charge. He assigned a technician to watch over
25 the crating and the loading of the piece of equipment. And he

1 said that there's a policy in the office over which he
2 overseas, that if there's a problem, if there's damage to the
3 freight, if there's damage to the crate, if there's an unusual
4 event during the process of loading that crate onto the truck,
5 there's a written report that needs to be filled out. And he
6 testified that he had been through the file with regard to this
7 piece of equipment. And there was no such report ever filed
8 regarding the events of February 5, 2003.

9 Now, we're establishing a non-event. We're
10 establishing a negative in a sense. But that's circumstantial
11 evidence that nothing bad happened on that day. That the
12 equipment and the crate were in good condition when it went on
13 the truck.

14 What else have we heard. Mr. Fisher told us that he
15 interviewed the technician who he assigned on that day. He
16 also said he had another employee, a young lady who was the
17 receptionist in their office in Fremont, California. And he
18 asked them what had occurred. Did they report verbally that
19 their had been any damage occurring in the crating and loading
20 of this piece of equipment onto the truck. He said no, they
21 reported nothing. Again, our effort to establish a non-event,

22 a negative, in essence. Circumstantial evidence that there was
23 nothing unusual that occurred in California and that this crate
24 and this piece of equipment was turned over to Central
25 Transport in good condition.

170

1 There's more. You heard Mr. Horetsky. Mr. Horetsky
2 was the Central Transport representative, I think his office is
3 in New York state. He was the gentleman that came down and
4 visited Accu-Spec on the date of the delivery. But Mr.
5 Horetsky explained in response to questions that I asked him,
6 that if a crate is ready to be picked up by a Central Transport
7 driver and it's damaged, the driver usually will not pick it
8 up. Nope, here the driver did pick it up. Again,
9 circumstantial evidence that there's not a problem with the
10 cargo on February 5, 2003.

11 Then there's another thing. There's a bill of
12 lading. This is that one-page document that was produced by
13 Logistics, actually made up by Logistics. And it is Exhibit
14 25. The Logistics' bill of lading for the pick up in
15 California. Demonstrates that it has a Central Transport

16 emblem on it. And it was signed on February 5, 2003, and it
17 was signed by the driver from Central Transport. And is there
18 any notation, I asked Mr. Horetsky, is there a procedure for
19 making a notation on the bill of lading about damage. And he
20 said yes. Is there any notation on this bill of lading when
21 that product was picked up in California. No. Again,
22 circumstantial evidence that the cargo was in good condition
23 when it was turned over to Central Transport in California.
24 Is there any evidence to the contrary? No. What
25 Mr. Cohen did was suggested to you all that the bill of lading

171

1 doesn't mean anything. Because look at the receipt that Jim
2 Mullen signed. Here, February 14th here in Erie. He signed
3 it, didn't notice, didn't note any damage to the equipment or
4 the crate, even though he had made an observation. Look at
5 that. But the distinction is Mullen got on to the phone and
6 called and said, you know, I just let the truck driver go, but
7 this thing is damaged. If these goods were damaged when they
8 left the dock or left the Dage facility in Fremont, California.
9 They changed trucks three, four, five times before it got to

10 Erie. The damage is visible based on what we saw from the
11 photographs. Why didn't somebody along the way say seems to be
12 damaged goods. Well, they didn't. They didn't. Somewhere in
13 that route someone mishandled this cargo. And then just put it
14 on the truck. Just put it on the truck.

15 I would suggest to you it's probably near the end of
16 its trip. Because if it showed up on a dock, let's say in
17 Chicago, damaged and the dock worker in Chicago didn't do that
18 damage, he's going to make a record of it to save his own butt.
19 So somewhere in that chain of custody, and they've acknowledged
20 that they had exclusive control over this cargo from California
21 to Pennsylvania. Somewhere it was mishandled, probably near
22 the end of the trip. I found Mr. Meabon, I think Mr. Meabon,
23 who was the driver, was completely credible. He just shows up
24 at work in the morning, the cargo is already on his truck. I
25 don't think he did anything wrong.

172

1 So is there evidence that establishes that the cargo
2 is in good shape when it was turned over to Central Transport
3 out in California. If we look at all of that circumstantial

4 evidence on the one side and look at the utter absence of any
5 contrary evidence on the other side, I would submit that you
6 should conclude that by a preponderance of the evidence it's
7 been established that this cargo is in good condition when it
8 was turned over to Central Transport.

9 How about arriving in Erie, as I've already touched
10 upon. These parties have now come to the conclusion or have
11 now admitted that yes, it was damaged once it arrived here.
12 And then is there damage, were there money damages suffered by
13 Accu-Spec as a result of this incident. Well, you heard Mr.
14 Carlson talk about the various types of money that they had to
15 pay out in order to have the equipment repaired. And we have
16 an exhibit that you're actually going to have available to you
17 in the jury room that outlines each of those categories of
18 damage. And I would suggest to you that they did the
19 reasonable thing. I mean, there's been a huge amount of effort
20 in this case to avoid responsibility. And arguments that have
21 been made, have included the idea that you should have looked
22 somewhere here in the states to get this thing repaired. Well,
23 it's under warranty. You're not going to send it back to
24 anyone but the manufacturer. You're not going to let someone
25 who isn't familiar with the design of this machine tinker with

1 it, tinker with a lead shield that exposes, potentially exposes
2 radiation to the operator. Come on, that's just ridiculous.
3 Yet, it's an argument that's made with a straight face in an
4 effort to avoid responsibility. You'll have this available.

5 I would submit to you that every nickel, every
6 nickel that Accu-Spec spent was appropriate and reasonable.
7 \$47,521.84 as I believe is the number.

8 So what is the defense. Well, it used to be new
9 versus used. But as Mr. Berlin pointed out, that is kind of a
10 new argument. That's gone. Now it's packaging. The
11 defendants have the burden of establishing for you that somehow
12 the shipper, us, or Dage, we stand in Dage's shoes, the shipper
13 caused the damage. And they have come up with this theory that
14 the packaging is the cause of the damage.

15 Let me review what the proof is and let's first talk
16 about a little physics. This is two-and-a-half tons of
17 machine. It's made of steel. It's lined with lead. It's
18 walls are thick. I'm going to show you a photograph. This is
19 Exhibit 6 and you'll have it available to you when you

20 deliberate. It's a photograph of the back of the machine.
21 Take a look at it closely when you have an opportunity to
22 deliberate. The walls are essentially the thickness from this
23 line to this line. It's not just sheet metal. It's lined with
24 lead. It's lined with lead. It's a very heavy piece of
25 equipment.

174

1 There's been a suggestion that somehow there should
2 be some sort of foam or crating over and under the shelf. This
3 thing doesn't wiggle. It's not jello, it's rigid. Once it is
4 set in the crate and blocked and these gentlemen, as they spoke
5 to you in their closings suggest, well, the blocking is just
6 gone. No, it isn't, there is no evidence that it's gone.
7 Remember, it's their burden to prove we caused the damage.
8 There is no evidence that this blocking was gone. Once it was
9 in the crate and blocked at the bottom, it's not going to
10 wiggle at the top.

11 Now, there's a suggestion about casters, you didn't
12 really hear anybody talk about casters because that's a new
13 argument, too. That somehow it's rolling around on the inside

14 of this box. It's not. Let's think about the proof. First of
15 all, let's think about the whole packaging theory, when did it
16 come up. You heard Mr. Horetsky testify. Horetsky was the
17 only person from Central Transport to see this crate,
18 physically see this crate. Did he do any kind of a report that
19 suggested after his visit to Accu-Spec that oh, the packaging
20 is bad, the packaging is bad. No such report, no such report.
21 He said in fact that he could barely see inside the crate, he
22 could barely see the machine as it was inside the crate.
23 Then we have the MTI people. We didn't hear from
24 anyone from MTI. Mr. Horetsky arranged for an outside
25 inspection company to come to Erie and look at this particular

175

1 piece of equipment. I'm not sure what exhibit number it is,
2 it's one page, you'll see on it MTI. It says nothing about
3 packaging. That's within a few weeks of it having arrived in
4 Erie. Says nothing about packaging.

5 And then there's Mr. Cackowski, who is the claims
6 manager, the gentleman who works for Central Transport. He
7 explained that he actually saw the report from MTI, and he saw

8 photographs of the crate and the equipment. And he writes his
9 report. He writes to Mr. Mullen on April 23, 2003. Does he
10 say anything about packaging. No, not a word. Doesn't say a
11 word about packaging. This whole packaging business is after
12 the fact. It's part of the energy that is being spent simply
13 to avoid responsibility.

14 Even as late as 2003, the holiday season of 2003,
15 when Mr. Berlin calls the people, I think he said he called a
16 Mr. Rafferty at Central Transport and said hey, you got to pay
17 this, you got to pay this. I said to Mr. Berlin why did you
18 say that to him. Because it was damaged in transit. You
19 people have to pay. And what did Rafferty tell him. Bad
20 packaging, no, no. He said well, I think they're claiming too
21 much, claiming too much. They're claiming \$120,000 or
22 something like that. Of course, by that point in time we had
23 already amended our claim to the actual amount of money that we
24 paid out. By that point in time, by the end of September, we
25 had the machine back, maybe it's early October. We had the

1 machine back, we knew what our actual damages were, we sent

2 them an amended claim. So all way, at the end of 2005 in the
3 holiday season, they're not saying a word about packing. Who
4 has seen the crate, other than Mr. Horetsky in his short visit
5 to Accu-Spec. Mr. Mullen saw the crate. Mr. Carlson saw the
6 crate. What did they say about it. We opened the panel, it's
7 snug, it doesn't roll around, it's two-and-a-half tons.

8 What about Mr. Fisher. He has sent a hundred of
9 these things out of his facility in Fremont with that crate
10 design. It's blocked at the bottom, it's not going to move at
11 the top, it's not jello.

12 Now, perhaps the most important fact I want to
13 emphasize to you is the question of packing. They're saying
14 that packing caused the damage, not mishandling. Perhaps it
15 was Mr. Knox who said you may have one. You have potential
16 mishandling, potential bad packing. Think about this. Take a
17 look, please, when you go back, at Exhibit 15, Plaintiff's
18 Exhibit 15. One of the witnesses, it might have been Mr.
19 Cackowski, might have been Mr. Horetsky, suggested, well, with
20 it bouncing down the road, you know it could be wiggling in
21 there, it could be hitting against the crate. Look at the
22 crush on this steel. That wasn't caused by it banging against

23 the wall of the crate. This is lead and steel. And then think
24 about how thick it is. This thing was jammed. It looked to us
25 like it was dropped.

177

1 Remember, I said to you in the opening statement and
2 even I think Mr. Knox mentioned it, we don't have to prove that
3 somebody was negligent. We don't have to prove somebody was
4 careless, we don't have to prove somebody mishandled it. We
5 don't have to prove that something intentionally damaged it.
6 We don't have to prove how it was damaged, if it was dropped.
7 It looked to us like it was dropped. I have no answer for this
8 tip and tell thing. Maybe something, it ran into a wall, I
9 don't know. The point is, as Mr. Berlin acknowledged, it was
10 damaged in transit, they should pay. That is the point. And
11 no rolling around in a crate, no bouncing down a road, is going
12 to cause the crushed damage that you see to that steel and lead
13 wall.

14 The damage claim here is \$47,521.84. It is a
15 reasonable claim. The law is very clear that when goods are
16 damaged in transit, the freight forwarder and the shipper, I'm

17 sorry, the freight forwarder and the motor carrier owe the
18 money. It has taken us two-and-a-half years in getting to this
19 point to ask you for that relief that seems so clear to us.

20 You've been very, very attentive, I appreciate that.

21 This is a big inconvenience in your life. And on behalf of
22 Accu-Spec, we appreciate all the attention you've given us and
23 it's been my pleasure to work with you. Thank you very much.

24 THE COURT: Members of the jury, I'm not going to
25 give you my charge right now because it's going to go a little

178

1 bit. It's five after four, then you have to start
2 deliberating, before you start to deliberate, then it's time to
3 send you home. So I'm going to send you home. We anticipated
4 finishing tomorrow anyways. I'm going to ask you to be back
5 here and I'll give you my charge at nine. And then you'll go
6 and you'll deliberate. I'm going to stay on the bench. Did
7 you have something, Mr. Cohen?

8 MR. COHEN: Your Honor, just one question, would you
9 permit any rebuttal?

10 THE COURT: No. So I'm going to stay on the bench,

11 you folks just mosey on in there and go home, we'll see you

12 tomorrow. Have a nice night, don't talk about the case.

13 (Jury dismissed at 4:06 p.m., for the day.)

14 THE COURT: Stick around here, my law clerk, it

15 occurred to me when I looked at the charge, one of the things

16 that were not included was a explication of the preponderance

17 of the evidence insofar as it relates to both the plaintiff,

18 and once the burden has shifted, few others things -- we'll

19 give you that, as well as the revised verdict form. Why don't

20 you plan on being here at a quarter to nine tomorrow, if there

21 are any additional questions, we can resolve them then.

22

23 (Whereupon, at 4:08 p.m., the Jury Trial proceedings

24 were adjourned for the day.)
